# Single-Use Bioprocess Tubing Kits & Assemblies

Made to Your Custom Specifications

## Here's what we offer in 3 Easy Steps

### 1. Design Your Assembly

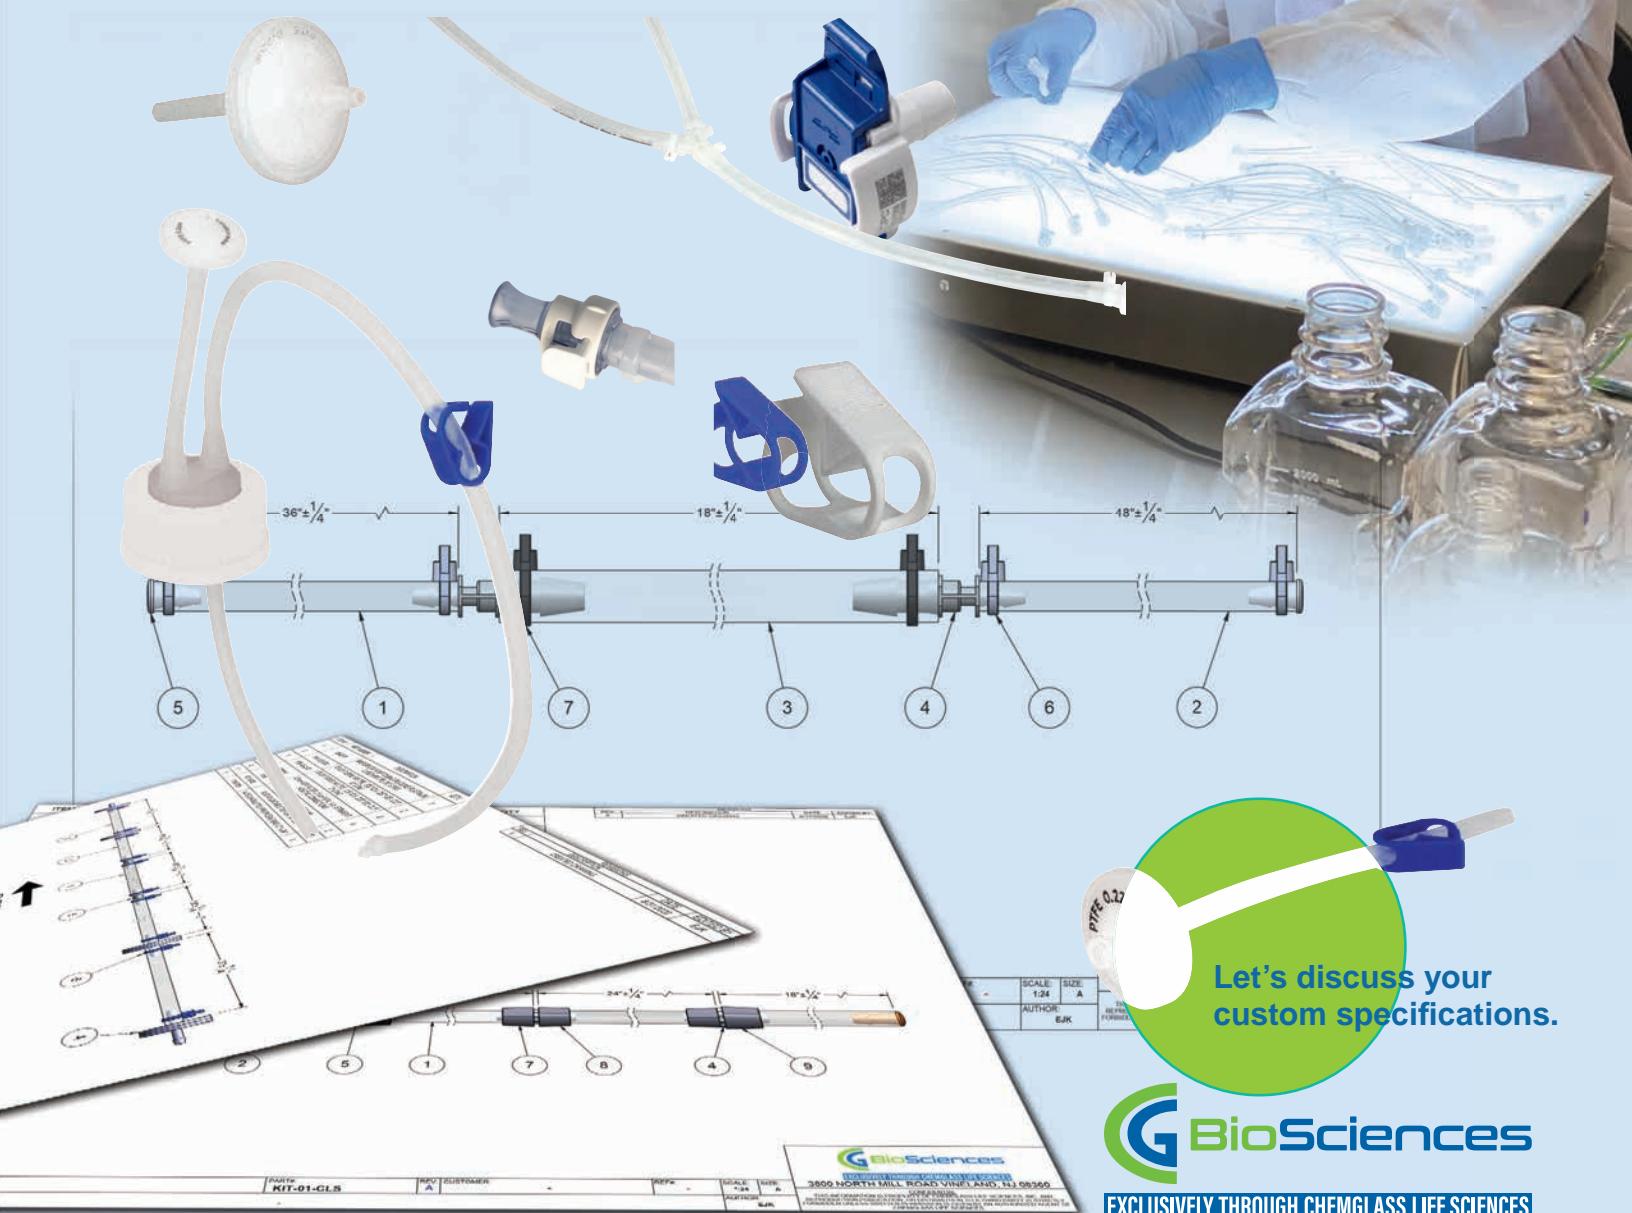

Technical specialists work with you to create / design the assembly and provide recommendations on tubing, fittings, quick connects and filter components.

### 2. Quotation And 2D Or 3D Drawing

Fast turnaround on your quotation and drawing of your assembly. The drawing will include details and a subcomponent bill of materials.

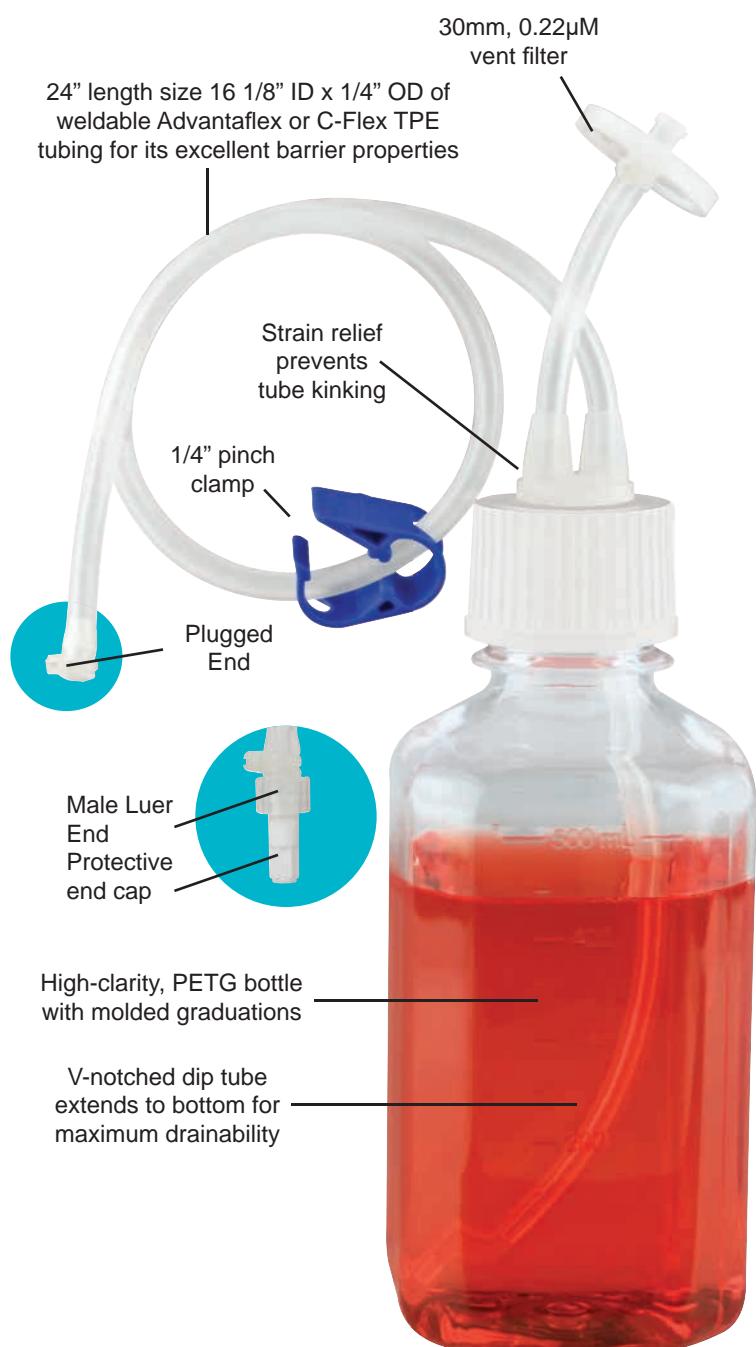

### 3. Delivery – Single Orders Or Blanket Orders

We work with you to meet your delivery needs on single orders or blanket delivery scheduling. Chemglass stocks many fluid handling components such as tubing, fittings, quick connects and filters so they are available when needed.

For custom quotes and inquiries contact [singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

# Single-Use Media Transfer Feed Bottles

## Single-Use Bottle Assemblies, PETG Bottles with PP Caps

- Designed to ensure an unobstructed fluid path
- Stopper includes molded strain relief to prevent kinking
- Manufactured, assembled and packaged in Class 7 cleanroom
- USP Class VI approved materials
- Animal Derived Component Free (ADCF)
- Gamma irradiated to Sterility Assurance Level (SAL) 10-6

Our single-use bottle assemblies in five standard sizes from 125mL to 2L. Each consists of a PETG bottle with a 2-port closure assembly, a 30mm / 0.22μm vent filter and a 24-inch length of tubing. Size 16 1/8" ID x 1/4" OD. A 1/4" pinch clamp is included on the tubing. The v-notched, dip tube extends to the bottom of the bottle for complete draining. Each unit is double poly-bagged and gamma irradiated at 25kGY-40kGY.

### Individually Bagged Caps, Sterile

# 2D Bioprocess Bags

## 2D Bioprocess Bags Featuring Medical Grade Renolit 9101 PE Film

### Key Benefits

- Bag chambers are manufactured using industry-proven Renolit 9101
- Strong physical design for the safe storage of product and process fluids
- TruFlo ports engineered for improved flow and minimum hold-up
- Flexible customization utilizing tubing, components, and vendor of choice

Assembled in ISO Class 7 clean room

### Standard Configurations

- Volumes of 50mL to 20L

### Port configurations:

- 2-ports for all (50mL to 20L)
- 3-port (500mL to 20L)
- 4-port custom (2L to 20L)

### Port size

- 1/8", 1/4", or 3/8"

### Applications

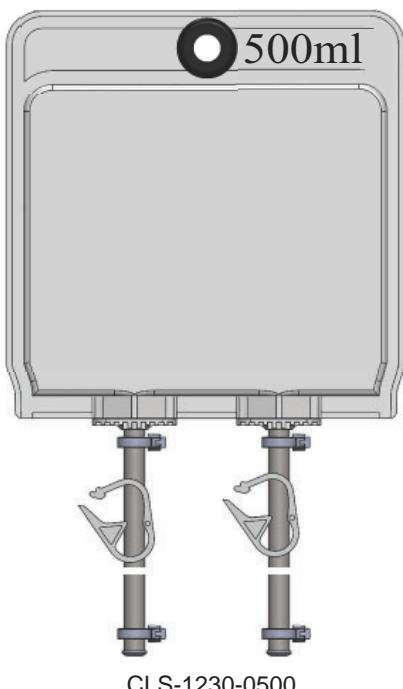

- Media and buffer storage
- Aseptic sampling
- Product collection and storage
- Customized filling manifolds
- Not for cryogenic storage
- Maximum low temperature -45°C

### Custom 2D Bags Assemblies Available

For custom quotes and inquiries  
contact [singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

### Stocked Bags - Other sizes and configurations available. Contact us.

## Medical Grade Renolit 9101 PE Film

## Renolit 9101 Polyethylene Film

All liquid single-use chambers are manufactured with industry-proven, medical-grade Renolit 9101 film, a multilayer film composed of a high-purity biocompatible polyethylene (PE) contact layer with internal ethylene vinyl alcohol (EVOH) oxygen-barrier.

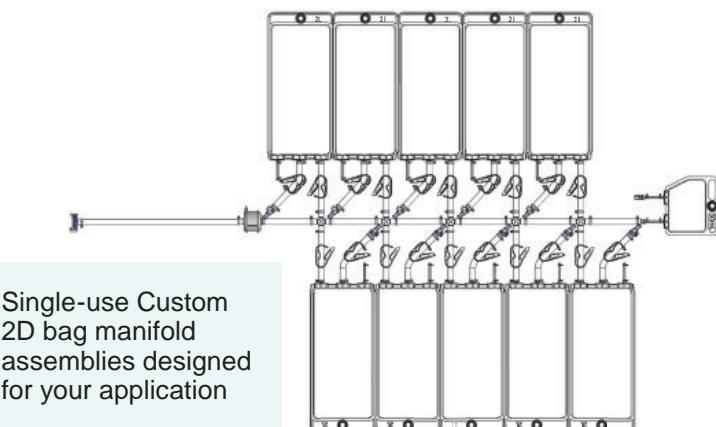

## Physical Properties

Property	Typical Value*
Film Thickness	0.325mm
Clarity	97% (ASTM D-1003)
Tensile Strength at Break	13MPa (ASTM D-882)
Elongation at Break	350% (ASTM D-882)
Break at Cold Temperature	< -45°C (ISO 8570)
Water Vapor Transmission†	0.32 g/m <sup>2</sup> /day (ASTM F-1249)
O <sub>2</sub> Permeability‡	<0.05 cm <sup>3</sup> /m <sup>2</sup> /day/bar (ASTM D-3985)
CO <sub>2</sub> Permeability‡	<0.2 cm <sup>3</sup> /m <sup>2</sup> /day/bar (ASTM F-2476)

Transmission values for film gamma-irradiated with 50 KGy. Other are for film gamma-irradiated with 25 KGy.

† @ 23°C, 100% RH. ‡ @ 23°C, 0% RH.

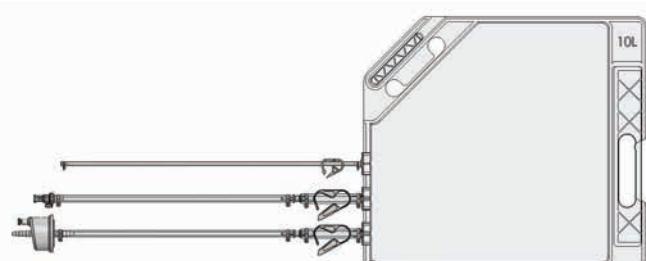

Custom Assemblies Available. For custom quotes and inquiries contact [singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

## Quality, Regulatory and Biocompatibility Properties

Category	Property / Test*
Biocompatibility	High-purity polyethylene (PE) and ethylene vinyl alcohol (EVOH)
	Animal-Derived Ingredient (ADI) Free
	ISO 10993-4, Hemolysis
	ISO 10993-5, Cytotoxicity
	ISO 10993-6, Implantation
	ISO 10993-10, Irritation and Sensitization
	ISO 10993-11, Acute System Toxicity
	USP <85>, Bacterial Endotoxins – LAL test
	USP <87>, Biological Reactivity in vitro
	USP <88>, Biological Reactivity in vivo, Class VI
Extractables / Leachables	USP <661.1>, Polyethylene Physicochemical Tests, Extractable Metals, Plastic Additives
	Ph. Eur. 3.1.5, Polyethylene with additives for containers for parenteral preparations and for ophthalmic preparations
Recommended Sterilization Method	Gamma

\* Pharmacopoeia and Biocompatibility compliance test reports available upon request

Customized 2D bioprocess assemblies are ideal for single-use biopharmaceutical applications.

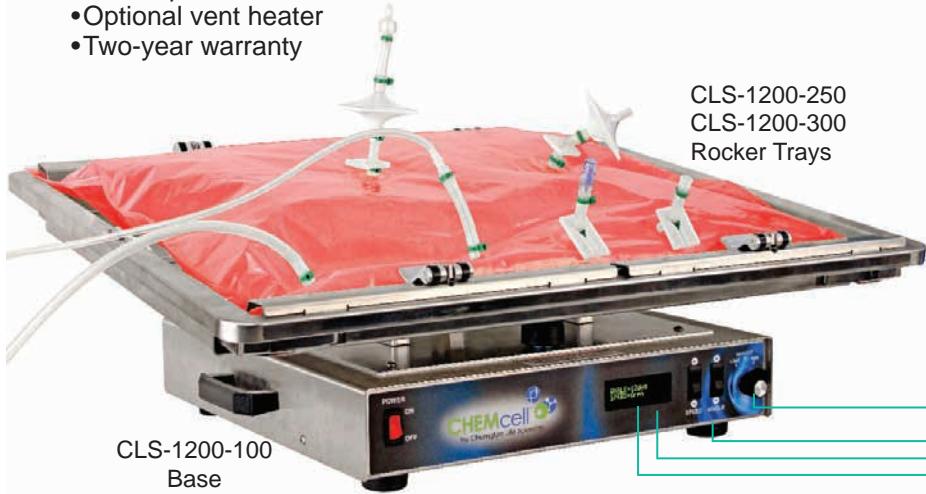

- Customized system design provides design flexibility and allows the system to fit the process rather than the process adapt to the system.
- We stock many common components that enables us to provide fast development and delivery while minimizing the risk of production delays

# Bag Rocker And Accessories CHEMcell®

## CHEMcell® Bag Rocker System

Provides increased flexibility with modular format, optional trays and accessories.

- Adjustable tray angle
- Variable speed rocking
- Quiet operation
- Optional vent heater
- Two-year warranty

### Position Control

Load - Harvest - Run

### Speed Control

2 to 40 per minute

### Tray Angle Control

2° to 12°

### Digital Display

Bright and Easy-to-Read

## Increased flexibility with modular format, optional trays and accessories.

Modular benchtop bag rocker system consists of a heavy-duty base unit and a choice of stainless steel rocker trays. Engineered for durability, it can be used in both research and development as well as production environments. The smooth rocking motion provides gentle, efficient mixing and gas transfer. Designed for optimal performance with Chemglass 8-port and 6-port cell culture bags but easily accepts other manufacturers' bags having the same dimensions. The optional bag and vent heater, made for use with both size trays, keeps vent filters free of harmful condensation that can clog filters and compromise cultures.

**NOTE:** Temperature controller, CLS-1200-2CH, must be purchased separately.

Specifications	CHEMcell Base	20 Liter Tray	50 Liter Tray

## Gas Mixing Module, CHEMcell™

The CHEMcell gas mixing module with touchscreen display is used for accurate mixing of two gases. It utilizes two Alicat gas flow controllers with built-in back pressure sensors for safe operation with a disposable bag or bioreactor. Flow rates are up to 1.1 liters per minute maximum. Gas totalizers allow you to track the total flow during the cell culture run.

### Specifications

- Dimensions: 7.25" High x 8.25" Wide x 8" Deep
- Electrical: 24 Volt DC, 110Volt plug in Power Supply
- Inlet Pressure Limitations: 20 PSIG
- Communications: Ethernet, RJ-485
- Tubing Connections: 1/4" Push/Pull Fittings for Polyurethane Tubing
- Gas Flow Limitations (CO<sub>2</sub>): 100 SCCM
- Gas Flow Limitations (Air): 1000 SCCM

## Air Pump for Cell Culture Rocker Bags

Air pump used to inflate cell culture bags for the CHEMcell Rocker Bioreactor System, CLS-1200-series. Pump has an output of 110 liters per hour and two outlets to inflate two bags. Supplied with one tubing kit comprised of 5ft of 1/8"ID x 1/4"OD tubing and two quick-connect adapters used to connect to the filter inlets on the cell culture bags.

### Air Pump Kit Complete

Part No.	Description	Price
<b>CLS-1200-AP</b>	Air Pump Kit Complete with 1 Tubing Kit	<b>\$71.60</b> *
<b>CLS-1200-TK</b>	5ft Tubing Kit with Two Luer Connectors	<b>\$14.90</b> *

**CLS-1200-AP**

## Bags, Cell Culture, Ultra Clear, 6-Port, Compatible with GE Wave™ Rocking Platforms, Cell Culture Bag

Cell culture bags are manufactured from ultra clear Renolit 9101 robust film and gamma irradiated. The film meets USP Class VI specifications and is contamination free. The inner product contact material is low density polyethylene. All bags and components content materials are USP Class VI tested. Excellent choice for mammalian and plant culture cell lines with extended mixing times.

## Erlenmeyer Flasks

### Flasks, Erlenmeyer, Baffled, Sterile, Polycarbonate

Quadruple baffled Erlenmeyer flasks are sterile, non-pyrogenic and manufactured with polycarbonate resin. Flasks are supplied with either exclusive DuoCap® designed for both aerobic and anaerobic applications (for aerobic applications the cap utilizes a 0.22µm pore size PTFE membrane for sterile air exchange; for anaerobic applications the cap can easily be converted to a solid cap design) or green filter caps. Solid top caps are also ideal for applications requiring mixing, shaking and storage of biological fluids. Graduations are molded for accuracy. New EZ-Tear packaging allows for easy access.

- Designed for mammalian suspension culture applications as well as bacterial & yeast culture
- Polycarbonate available with vent cap only
- Vent caps with over-sized vent area feature 0.22µm hydrophobic membrane which allows for improved gas exchange without contamination
- Avoid contamination with single-use, pre-sterilized flasks
- Lightweight material is easier to handle than glass
- Bottles include molded graduation lines
- Individually bagged for easy storage and handling
- Medical grade virgin Polycarbonate is autoclavable

## Flasks, Polycarbonate, Vented Caps, Baffled Bottom

CELLTREAT® Erlenmeyer and Fernbach culture flasks are designed for shaker and cell culture applications. All flasks feature a 70mm neck size that provides easy access for filling and dispensing. The unique shape of the Fernbach flask provides an increased surface area to volume ratio for improved gas exchange. The flasks are available in 2L Erlenmeyer, 2L and 3L Fernbach sizes, with baffled bottoms. The polypropylene caps are knurled for secure grip and are configured in 70mm large vent or non-vented styles. The flasks are constructed from an optically clear polycarbonate material that can be autoclaved. All flasks include a vented cap and are individually packed in bags and gamma irradiation sterilized. Additional caps are available separately.

## NEST High Efficiency Polycarbonate Flasks with Solid or Vent Caps, Sterile, USP Class VI

- Polycarbonate has high standard of transparency and the flask has a clear graduation scale for easy observation.
- Sterilized by E-Beam
- Non-Pyrogenic
- Packaged in sterile bags, 4 per case

### Tips

- Recommended volume: 30-40% of the bottle volume.
- Rotation speed suggestion: the starting speed is 75-125RPM, you can control the rotation speed according to the application.

The imported medical-grade polycarbonate that meets with the requirements of ISO 10993 USP<661> is chosen as the raw materials, which has high transparency, great impact resistance, oxidation resistance and can withstand a high temperature of up to 121°C. The scale is clear and accurate when looked at from the outside, which facilitates the observation of the volume of culture medium. The vent cap is equipped with a 0.22μm breathable film which is air-permeable and water-proof to efficiently prevent the passing of micro-organisms and contamination and to ensure gas exchange for good growth of cells or bacteria. The products have undergone the tightness test, drop test, high-temperature and high-voltage tests, flatness test, tensile test, endotoxin test, sterilization test, DNA/RNA enzyme-free tests and cell culture test, all the results of which meet the corresponding quality standards.

### 3L Media Transfer Vessels with Barbed Fittings, Weldable C-Flex Tubing, Plugged, Plain or Baffled Bottom, Sterile

Media transfer vessels are ideal for doing gravity feeds from sterile 3L vessels. Fernbach flasks are sterile and individually double bagged.

Three liter polycarbonate flasks with filter caps have 3/16" barbed fittings that accept 1/8" ID x 1/4" OD weldable C-Flex® tubing ending in a plug 24" L. Each is supplied complete with a tubing clamp. Irradiated sterile. Call for bulk pricing.

### 5L Sterile Media Transfer Flask with Platinum-Cured Silicone Tubing and Quick Disconnect

- Quick disconnect fitting on tubing
- 1/4" ID x 7/16" OD platinum-cured silicone tubing

Dual purpose, 5L transfer flasks are designed for the sterile transfer of liquids as well as for single-use inoculation vessels. They're ideal for use doing gravity feed from sterile, 5L vessels.

Erlenmeyer-style, polycarbonate flask includes a cap with 0.2 µm hydrophobic filter, 3/16" barbed fitting, 1/4" ID x 7/16" OD platinum-cured tubing, tubing clamp and quick disconnect. Supplied gamma irradiated, sterile and individually double bagged.

# Fernbach Flask

CLS-2020 series

## Flasks, Fernbach, 2800mL, Without Baffles

Flasks are designed for culturing organisms that require a large surface area to volume ratio. Available with a plain 59mm ID neck, 38mm OD Delong® style neck or GL-45 screw neck supplied with a vented cap.

Part No.	Description	Price
CLS-2020-10	Plain 59mm ID Top, Without Baffles	\$187.65 *
CLS-2020-11	38mm DeLong® Top, Without Baffles	\$224.75 *
CLS-2020-30	GL-45 Screw Thread, Vented Cap, Without Baffles	\$257.50 *

### Replacement Parts

Part No.	Description	Pkg	Price
CLS-1484-B-45	GL-45 Cap Vented	5	\$65.70 *
CLS-1482-13	Pouring Ring GL-45, Blue	10	\$17.20 *

## Flasks, Fernbach, 2800mL, Without Baffles

2800mL flasks are designed for culturing organisms that require a large surface area to volume ratio. Available with 70mm screw neck with a solid or vented cap with 0.22µm PTFE Membrane.

Part No.	Description	Price
CLS-2021-70	70mm Screw Thread, Solid Cap, Without Baffles	\$314.55 *
CLS-2021-72	70mm Screw Thread, Vented Cap, Without Baffles	\$331.50 *

### Replacement Parts

Part No.	Description	Price

# Fernbach Flask

CLS-2026 series

CLS-2054 series

CLS-1502 series

## Flasks, Fernbach, 2800mL, With 6 Baffles

Flasks are designed for culturing organisms that require a large surface area to volume ratio. Flask has 3 baffles on the lower outside edge and 3 baffles on the bottom surface to help oxygen transfer to the culture medium. Available with a plain 59mm ID neck, 38mm OD Delong® style neck or GL-45 screw neck supplied with a vented cap.

Part No.	Description	Price
CLS-2026-20	Plain 59mm ID Top, With 6 Baffles	\$327.20 *
CLS-2026-22	38mm DeLong® Top, With 6 Baffles	\$338.00 *

## Flasks, Shake, 2L, 6 Bottom Baffles, 70mm

Flask has 6 bottom baffles to maximize oxygen transfer for bacterial, yeast and other cultures that require large amounts of oxygen for optimal growth. The 70mm vented cap has a 0.20µm PVDF hydrophobic membrane to allow for sterile gas exchange while preventing contamination. A silicone liner ensures a tight seal between the cap and flask. A solid cap is available for anaerobic cultures. The flasks, cap and liners are all fully autoclavable.

Part No.	Description	Price

## Closures, Stainless Steel

These closures are made from 305 Stainless Steel. They are ideal for use with culture tubes and flasks utilizing Delong® Necks. The closure is designed with finger grips to allow it to fit firmly on any Delong® Neck. It will withstand both dry heat sterilization and repeated autoclaving.

## Stainless Steel Closures

Part No.	Description	Qty	Price
CLS-1502-018	Closure, 18mm Stainless Steel	10	\$21.80 *
CLS-1502-025	Closure, 25mm Stainless Steel	10	\$32.20 *
CLS-1502-038	Closure, 38mm Stainless Steel	10	\$105.80 *

Visit our site for Shaker Flasks

## Closures, Polypropylene

Delong® style closure made of polypropylene. Closure offers two positions, open for gas exchange or closed for humidified environment. Internal drip ring minimizes contamination. Autoclavable to 121°C

### Polypropylene Closures

Part No.	Description	Qty	Price
<b>CLS-1503-09</b>	25mm Closure	10	<b>\$14.70 *</b>
<b>CLS-1503-10</b>	38mm Closure	10	<b>\$27.45 *</b>

## Closures, Silicone Sponge

The silicone sponge closure is manufactured with a sealed in silicone sponge filter. Flange fits snugly over the necks of vessels permitting the exchange of gases, while reducing evaporation and preventing the passing of aerosols. Ideal for use with aerobic cultures. Reusable, autoclavable and will withstand dry heat sterilization up to 180°. Closure will withstand both dry heat sterilization and repeated autoclaving.

## Transfer Cap Assemblies

### Feed Bottle Transfer Assemblies with GL-45 Threaded Caps, Two Ports, AdvantaFlex® Tubing, Sterile

Chemglass Life Sciences GL-45 cap transfer assemblies are available in sizes from 125mL-1L. These transfer assemblies are extremely helpful for sterile transfer of liquids from containers or bottles which have a GL-45 threaded neck. Our assemblies are a great choice to achieve sterile fluid transfer when using Corning and Thermo Fisher filter systems and storage bottles.

Each 2-port GL-45 closure assembly includes a 0.22μm filter, 24 inch length of AdvantaFlex® tubing with a plugged end, 1/4" pinch clamp and a V-notched dip tube. The assembly is made from pharmaceutical grade thermoplastic elastomer resin. Manufactured, assembled and packaged in a Class 7 cleanroom, USP Class VI approved components. Each assembly is individually double poly-bagged and gamma-irradiated.

**Please note:** Compatible with Fisher / Nunc brand and Corning brand filter media bottles.

## Transfer Assemblies, Vented, for Single-Use Media Bottles, with Plugged Ends and Advantaflex TPE, Weldable Tubing, Sterile

Transfer cap assemblies, vented for Single Use Media bottles are a cost effective and convenient way to transfer liquid. The venting port ends in a 30mm diameter vent filter with a 0.20µm pore PTFE (hydrophobic) membrane and barbed fitting. All components in contact with the media are USP Class VI and the Size 16 tubing has a clamp and a plugged end (24" length). Tubing with a tubing clamp and ending with a plugged end. Individually double bagged and gamma irradiated sterile.

## 3L Transfer Assembly with Plugged End and Weldable C-Flex® Tubing, Sterile

Available for Corning and CellTreat Flasks

Transfer cap assemblies for 3L Fernbach flasks. The venting port ends in a 50mm diameter vent filter with a 0.20µm pore PTFE (hydrophobic) membrane and barbed fitting. On the external side you will find 1/8" ID x 1/4" OD weldable C-Flex® tubing with a tubing clamp and ending with a 1/8" end tube plug. The liquid transfer port has an internal end with a rigid 1/8" x 1/4" OD C-Flex dip tube to reach the bottom of the flask. Individually double bagged and gamma irradiated sterile.

# Centrifuge Sample Tube™ Assemblies

Continuous tubing is over-molded into stopper to eliminate detachment.

## Sterile Sample Tube Assemblies with C-Flex® Inlets

Polypropylene centrifuge tube assemblies feature closed cap assemblies with 18" of Size 16 (1/8" x 1/4") C-Flex tubing inlet line with pinch clamps and plugs. They include 3" vent lines and PTFE filters. Certified sterile.

Assemblies can be used for sampling and transfer of biopharmaceutical products and reagents in closed systems. Individually bagged in an outer bag of ten.

- Over-molded dip tubes eliminate risk of detachment
- Polypropylene centrifuge tubes
- Completely closed cap systems
- Include tubing, pinch clamps and vent filters

- **Wide neck screw thread** – 80mm diameter, special thread design for rapid opening and closing.
- **Inert and chemically resistant** – exceptional properties of DURAN® eliminate problems with ion leaching.
- **Mechanical strength** – the sturdy design of these wide neck bottles enhances safety and service life.
- **Autoclavable** – excellent thermal properties for autoclaving and dry sterilization.
- **Transparency** – contents and volume can be visually checked with ease.
- **Traceability** – the eight-digit batch code allows the bottles to be traced back to the point of production, including the matching batch. The end-user can use the corresponding item number to retrieve a batch and quality certificate for any DURAN® laboratory bottle at any time via the Internet.
- **Stability** – the large, stable base area allows for safe and easy storage.
- **Labeling** – provided with a printed white panel for labeling the contents.
- **Graduated** – convenient, easy-to-read graduations indicating volume.
- **User-friendly** – the special thread design enables the bottle to be opened and closed quickly with less than two turns of the cap.
- **Temperature-resistant** – the polypropylene cap is autoclavable up to 140°C.
- **Matching pouring ring** – for drip-free pouring.

### 4-Port Adapter, GL-80, 1/4" & 1/2" Hose Barbs, Stainless Steel

The 4-Port inlet assembly fits bottles with GL-80 threads. The assembly incorporates four separate pipes into one assembly for efficient use of space. Each port can be used individually for reagent addition. Adapter has (2) 1/4" Hose and (2) 1/2" barbs for connection to flexible tubing. Inside the reactor, the tubes are 1" long and are barbed.

### 4-Port Adapter, GL-80, 1/4" & 1/2" Hose Barbs, Stainless Steel

Part Number	Description	Pkg. Qty.	Price
CLS-1380-480	4-Port Adapter, GL-80, (2) 1/4" & (2) 1/2" Hose Barbs, Stainless Steel	1	\$406.60 *

## Bottles, Amber, Media Storage, Duran

Heavy duty bottle which can be used for storage as well as mixing and sampling. Glass bead indicates full capacity line on 100mL through 2L size. Bottles have permanent white enamel graduations and marking spots. Optional red PBT caps and red ETFE pouring rings are available for dry heat sterilization (180°C). Solid, color-coded polypropylene caps in a choice of orange, green, purple, red, and light gray are available. Open-top caps and PTFE/Silicone septa are also available

Bottles Only (No Caps)

CAUTION: Bottles larger than 2L should NOT be used with bottle top filter units, or in other applications involving vacuum pressure, as breakage may occur. DO NOT have caps tightened immediately after autoclaving as the vacuum resulting from cooling can cause breakage. A pouring ring is not included on 25mL size. A vented cap is NOT recommended for use on the 5L and 10L bottle.

## Bottles, Media Storage, Duran®

Heavy duty bottle which can be used for storage as well as mixing and sampling. Bottle available with closure which includes liner-less, one-piece autoclavable polypropylene plug seal cap with drip free pouring rings, or without closures in both clear and amber (For amber see CLS-1175). Optional red PBT caps and red ETFE pouring rings are available for dry heat sterilization (180°C). Glass bead indicates full capacity line on 100mL through 2L size. Bottles have permanent white enamel graduations and marking spots. Solid, color-coded polypropylene caps in a choice of orange, green, purple, red, and light gray are available. Open-top caps and PTFE/Silicone septa are also available.

## Media Bottles with Siphon Assembly

Standard media bottle with siphon assembly consisting of stainless steel siphon pipe and silicone tubing cut to length. All stainless parts are manufactured from 316L stainless steel electropolished to a 20Ra or better finish. The silicone tubing is peroxide cured and meets 21 CFR 177.2600 material specifications.

Assembled, the media bottle with siphon assembly allows the user to create precisely the desired dip tube angle to retrieve virtually all of the contents of fluid from the bottle.

## Bottles, Media, Square, Sterile, PETG, Graduated, Tamperproof Cap

Gamma sterilized non-pyrogenic media bottles manufactured from USP Class VI (PETG) polyethylene terephthalate copolyester with tamperproof white polypropylene caps. Tamperproof caps provide a visual indication that the bottle has not been opened once sealed. Once sealed the tamperproof ring will separate from the cap giving a visual indication that the bottle has been opened. Pyrogen, DNase, RNase and Particle-Free. Bottles proved reduced permeability to both CO<sub>2</sub> and O<sub>2</sub>. Note: These bottles are not autoclavable.

## Media Bottle Filling Station, Transfer And Feed, 2L Media Bottle Filling Base With Insert For 1L Bottle

The media bottle filling station allows for the media bottle cap to be supported and the bottle held in a stationary fixture so both hands are free for pouring. For use with CLS-1168 series square 1L and 2L transfer and feed media bottles. The filling station has an adjustable height cap support arm and recesses for both the 1L and 2L caps to be held securely. A removable adapter in the base allows for easy switching between bottle sizes, and other adapters can be made upon request. The filling station is constructed of Class VI certified medical grade BioMed White Resin and can be sterilized by autoclave, E-beam, gamma, and ethylene oxide. It may also be cleaned with IPA or TPM, alcohol-based cleaning solutions may be used but do not soak for extended periods of time.

## Vent Port Assemblies For Transfer Bottles

Vent port assemblies constructed of 316L stainless steel and electropolished to a 20Ra or better finish. Configurations consist of a single vent tube, vent and short fill tubes, or angled vent and fill tubes. Supplied with a GL-45 open top cap and silicone gasket. Precision pump tubing size to fit adapters is listed.

## GlucCell® Glucose Monitoring System

- Suitable for both serum and serum-free culture medium in mammalian and insect cell culture
- Portable, pre-calibrated, ready-to-use, plug & play, and disposable
- 99.5% correlated with NOVA and YSI biochemical analyzer
- Precision: >95%, Accuracy >90%, Linearity = 0.9997
- Programmable
- One-year warranty on meter

GlucCell® Glucose Monitoring System speeds and simplifies your glucose measurement during cell culture. GlucCell® Glucose Monitoring System is specially designed for measuring the glucose metabolites during animal cell culture, unlike general diabetes glucose meters on the market that are not applicable for animal cell culture.

This package contains a portable, palm size glucose meter and pre-calibrated, disposable test strips, designed for measuring the glucose concentration during mammalian cell and insect cell culture.

GlucCell® Glucose Monitoring System is intended for use by laboratory researchers or bioreactor professionals to obtain a quantitative measurement of glucose in cell culture media. It is made to meet your needs with calibration-free, maintenance-free, high accuracy, instant, disposable and portable.

**One-year warranty on equipment.**

### Specifications

<b>Dimension</b>	96mm x 60mm x 18.5 m/m
<b>Weight</b>	70 g including battery
<b>Power source</b>	CR2032 3V Lithium coin battery X 1
<b>Battery Life</b>	Approximately 1,000 tests
<b>Display</b>	Large LCD
<b>Memory</b>	Store 180 test results with date and time
	Auto electrode inserting detection
<b>Automation</b>	Auto sample loading detection
	Auto reaction time count-down/Auto turn-off
<b>Environment</b>	10 - 40 ~ C (50-104 ~ F) , 20-80 RH
<b>Strip size</b>	45mm x 6mm x 0.6mm
<b>Require sample</b>	3-10 $\mu$ l
<b>Measure range</b>	30-550 mg/dl (1 .6-30.6mmol/L)
<b>Test result time</b>	15 seconds

### GlucCell® Glucose Monitoring System

Part Number	Description	Package	Price
<b>CLS-1322-02</b>	GlucCell® Glucose Monitoring System	1 ea. Glucose Meter, 2 ea. bottles, each contains 25 strips	<b>\$542.10 *</b>
<b>CLS-1324-01</b>	GlucCell® Glucose Test Strips	2 ea. bottles, each contains 25 strips	<b>\$95.55 *</b>

GlucCell® Monitoring System includes a palm size meter and disposable test strips, enabling instant and accurate reading for glucose monitor during cell culture.

Disposable test strips, 3 $\mu$ l sample, and palm size meter enable operation in a biosafety cabinet, eliminating the risk of contamination by biohazardous samples.

## 1L Cell Culture Bioreactor Systems, Unjacketed

16 Port Headplate (4)

Graduated Vessel (1)

Support Stand (2)

Vortexing Impeller (3)

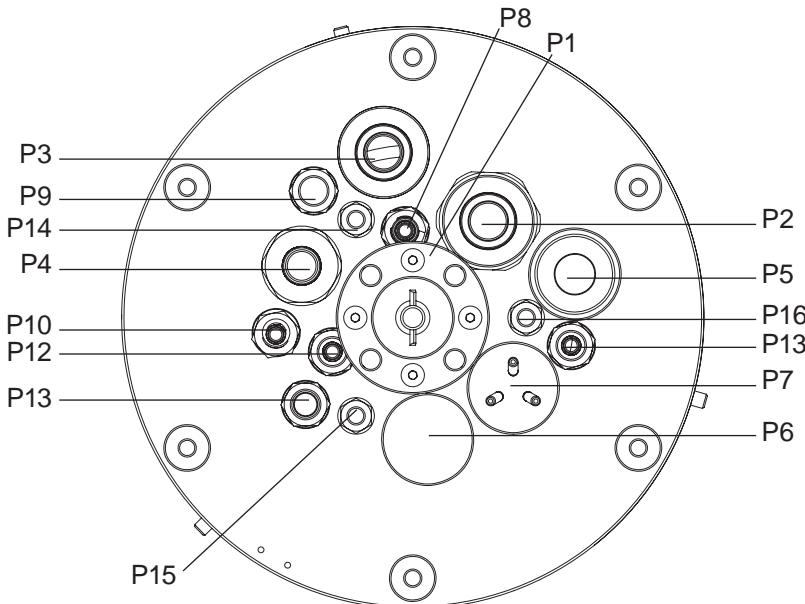

Cell culture bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact

P13	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P14	CLS-1380-22	M6	Blind Stopper
P15	CLS-1380-22	M6	Blind Stopper
P16	CLS-1380-22	M6	Blind Stopper

## Additional Items Included with CLS-1380-CC1M

Item No.	Part No.	Description
5	CLS-1399-100	Overhead Stirrer and Controller, 120VAC

## 2L Cell Culture Bioreactor Systems, Unjacketed

Agitator Assembly for Use with

CLS-1399-100 Overhead Stirrer.

Additional Adapters are available for other style motors.

16 Port Headplate (4)

Graduated Vessel (1)

Support Stand (2)

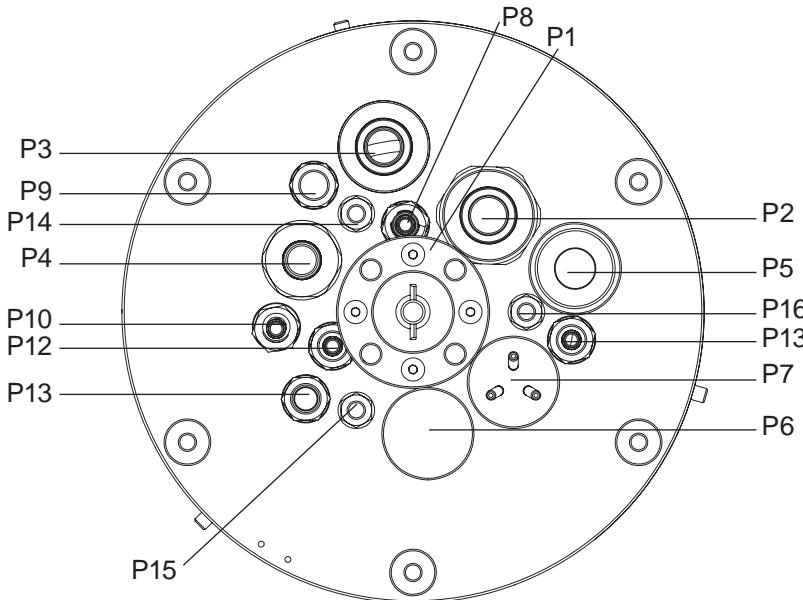

Vortexing Impeller (3)

Cell culture bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact

[singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

Part Number	Description	Price
<b>CLS-1380-CC2</b>	2L Cell Culture Bioreactor System Complete, Without Motor	\$7,928.15
<b>CLS-1380-CC2M</b>	2L Cell Culture Bioreactor System Complete, With Motor	\$10,915.30

## Standard Components Supplied with Complete Systems

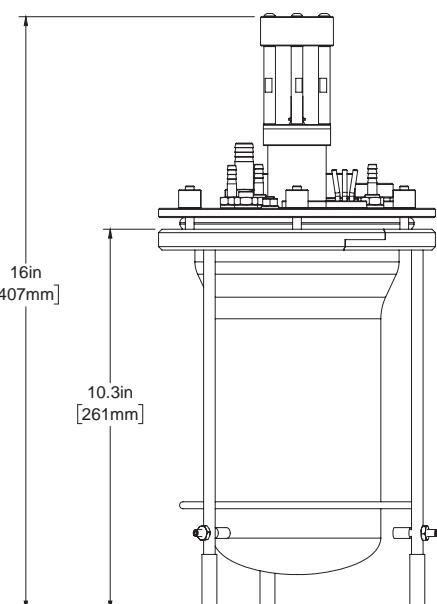

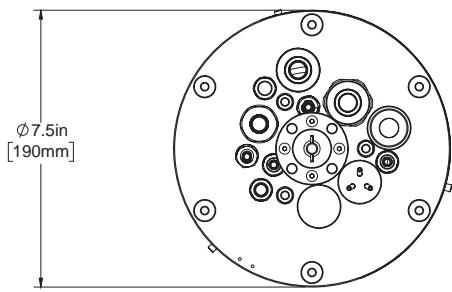

Item No.	Part No.	Description
1	CLS-1379-01	Bioreactor, 2L, Unjacketed, Graduated
2	CLS-1380-STD3	Support Stand, Complete
3	CLS-1380-06	Vortexing Impeller 43mm OD
4	CLS-1379-02	Headplate, 16 Port

## Headplate Configuration and Components

Port No.	Part No.	Size	Description
P1	CLS-1380-05	M30	Agitator Assembly
P2	CLS-1381-07	G3/4	pH/DO Adapter, for 12mm Sensor
P3	CLS-1381-06	M18	pH/DO Adapter for 12mm Sensor
P4	CLS-1380-70	M18	Sampling Tube/ Harvest Tube
P5	CLS-1380-10	M18	Septum Holder
P6	CLS-1380-25	M18	Blind Stopper
P7	CLS-1380-09	M18	Triple Port Adapter
P8	CLS-1380-21	M10	Adjustable Sampling Pipe
P9	CLS-1380-23	M10	Blind Stopper
P10	CLS-1379-04	M10	Porous Sparge Tube, 15 um Frit
P11	CLS-1380-11	M10	Thermowell, 200mm Immersion
P12	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P13	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P14	CLS-1380-22	M6	Blind Stopper
P15	CLS-1380-22	M6	Blind Stopper
P16	CLS-1380-22	M6	Blind Stopper

## Additional Items Included with **CLS-1380-CC2M**

Item No.	Part No.	Description
5	CLS-1399-100	Overhead Stirrer and Controller, 120VAC

## 3L Cell Culture Bioreactor Systems, Unjacketed

18 Port Headplate (4)

Graduated Vessel (1)

Support Stand (2)

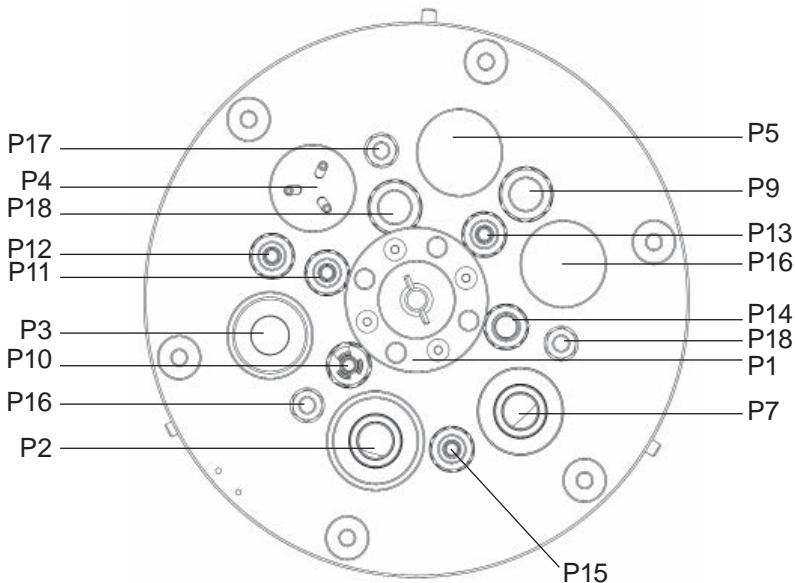

Vortexing Impeller (3)

Cell culture bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact

Part Number	Description	Price
<b>CLS-1380-CC3</b>	3L Cell Culture Bioreactor System Complete, Without Motor	\$8,643.00
<b>CLS-1380-CC3M</b>	3L Cell Culture Bioreactor System Complete, With Motor	\$11,630.15

## Standard Components Supplied with Complete Systems

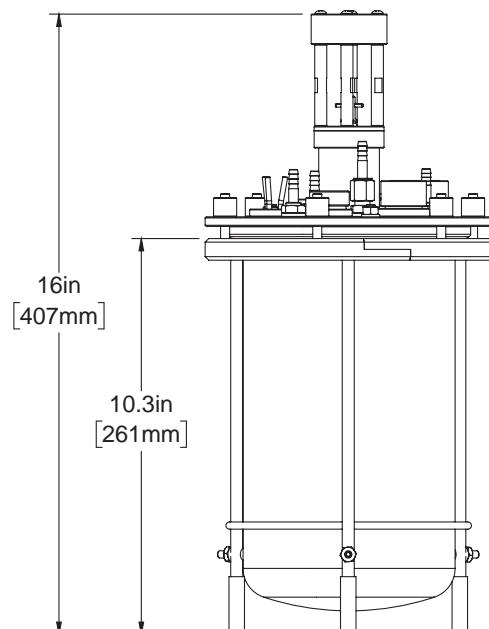

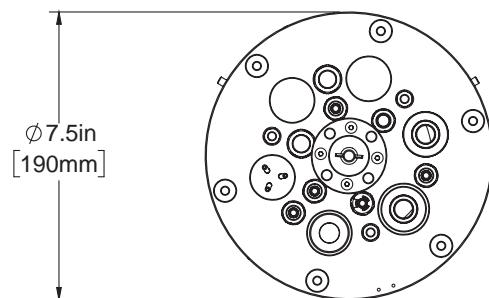

Item No.	Part No.	Description
1	CLS-1380-01	Bioreactor, 3L, Unjacketed, Graduated
2	CLS-1380-STD3	Support Stand, Complete
3	CLS-1380-06	Vortexing Impeller 43mm OD
4	CLS-1380-03	Headplate, 18 Port

## Headplate Configuration and Components

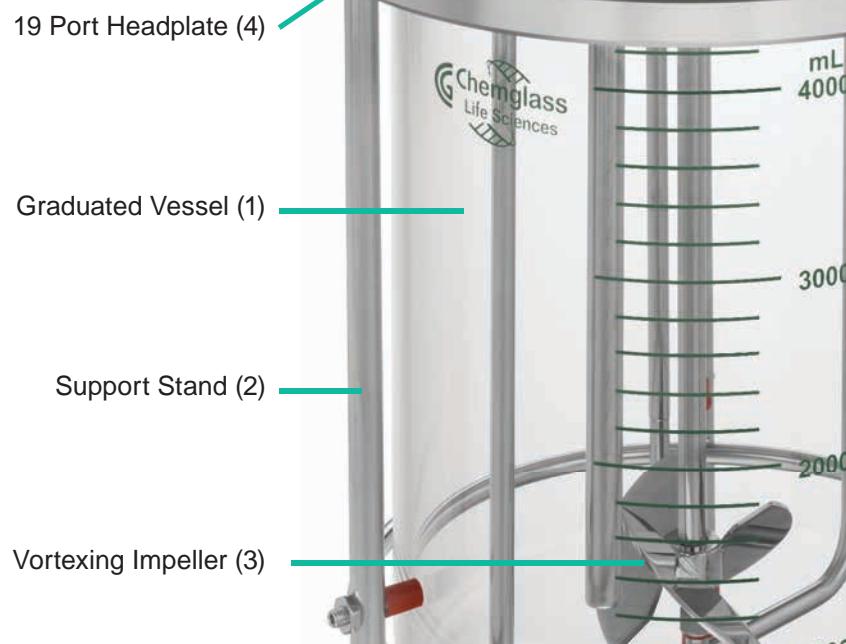

Port No.	Part No.	Size	Description
P1	CLS-1380-05	M30	Agitator Assembly
P2	CLS-1381-07	G3/4	pH/DO Adapter, for 12mm Sensor
P3	CLS-1380-10	M18	Septum Holder
P4	CLS-1380-09	M18	Triple Port Adapter
P5	CLS-1380-25	M18	Blind Stopper
P6	CLS-1380-25	M18	Blind Stopper
P7	CLS-1381-06	M18	pH/DO Adapter for 12mm Sensor
P8	CLS-1380-24	M12	Blind Stopper
P9	CLS-1380-24	M12	Blind Stopper
P10	CLS-1380-21	M10	Adjustable Sampling Pipe
P11	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P12	CLS-1380-12	M10	Porous Sparge Tube, 15 um Frit
P13	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P14	CLS-1380-11	M10	Thermowell, 200mm Immersion
P15	CLS-1380-32	M10	Harvest Tube
P16	CLS-1380-22	M6	Blind Stopper
P17	CLS-1380-22	M6	Blind Stopper
P18	CLS-1380-22	M6	Blind Stopper

## Additional Items Included with CLS-1380-CC3M

Item No.	Part No.	Description
5	CLS-1399-100	Overhead Stirrer and Controller, 20VAC

## 5L Cell Culture Bioreactor Systems, Unjacketed

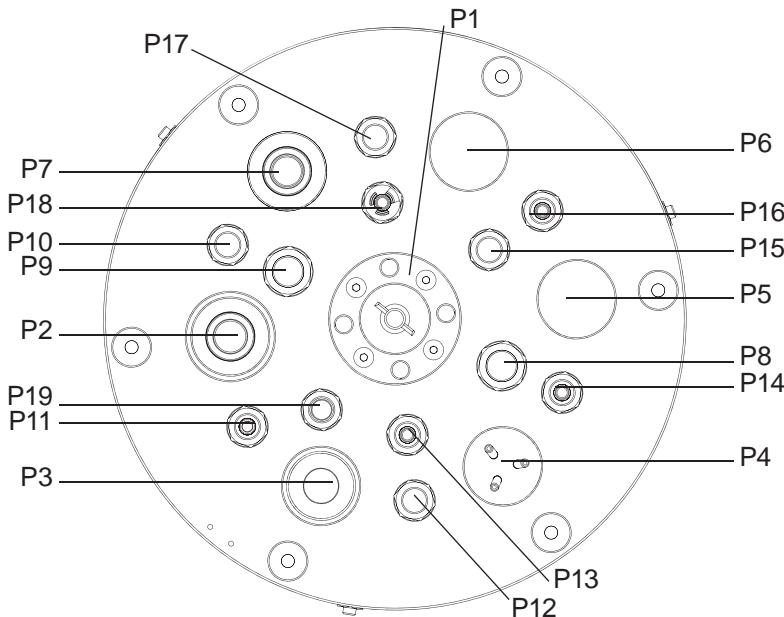

Cell culture bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact

[singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

Part Number	Description	Price
<b>CLS-1382-CC5</b>	5L Cell Culture Bioreactor System Complete, Without Motor	\$9,251.25
<b>CLS-1382-CC5M</b>	5L Cell Culture Bioreactor System Complete, With Motor	\$12,238.40

## Standard Components Supplied with Complete Systems

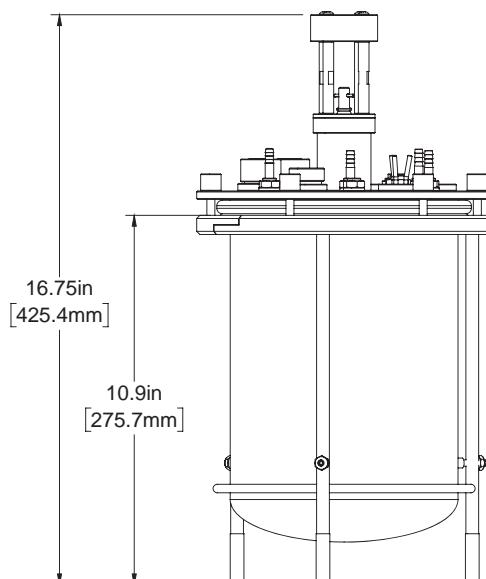

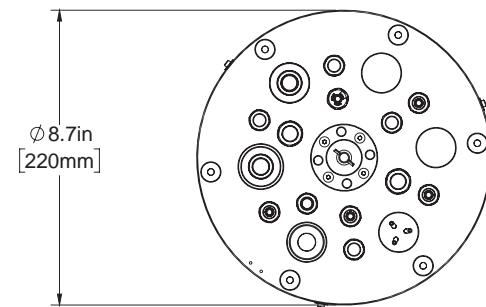

Item No.	Part No.	Description
1	CLS-1382-01	Bioreactor, 5L, Unjacketed, Graduated
2	CLS-1382-STD5	Support Stand, Complete
3	CLS-1382-05	Vortexing Impeller 59mm OD
4	CLS-1382-03	Headplate, 19 Port

## Headplate Configuration and Components

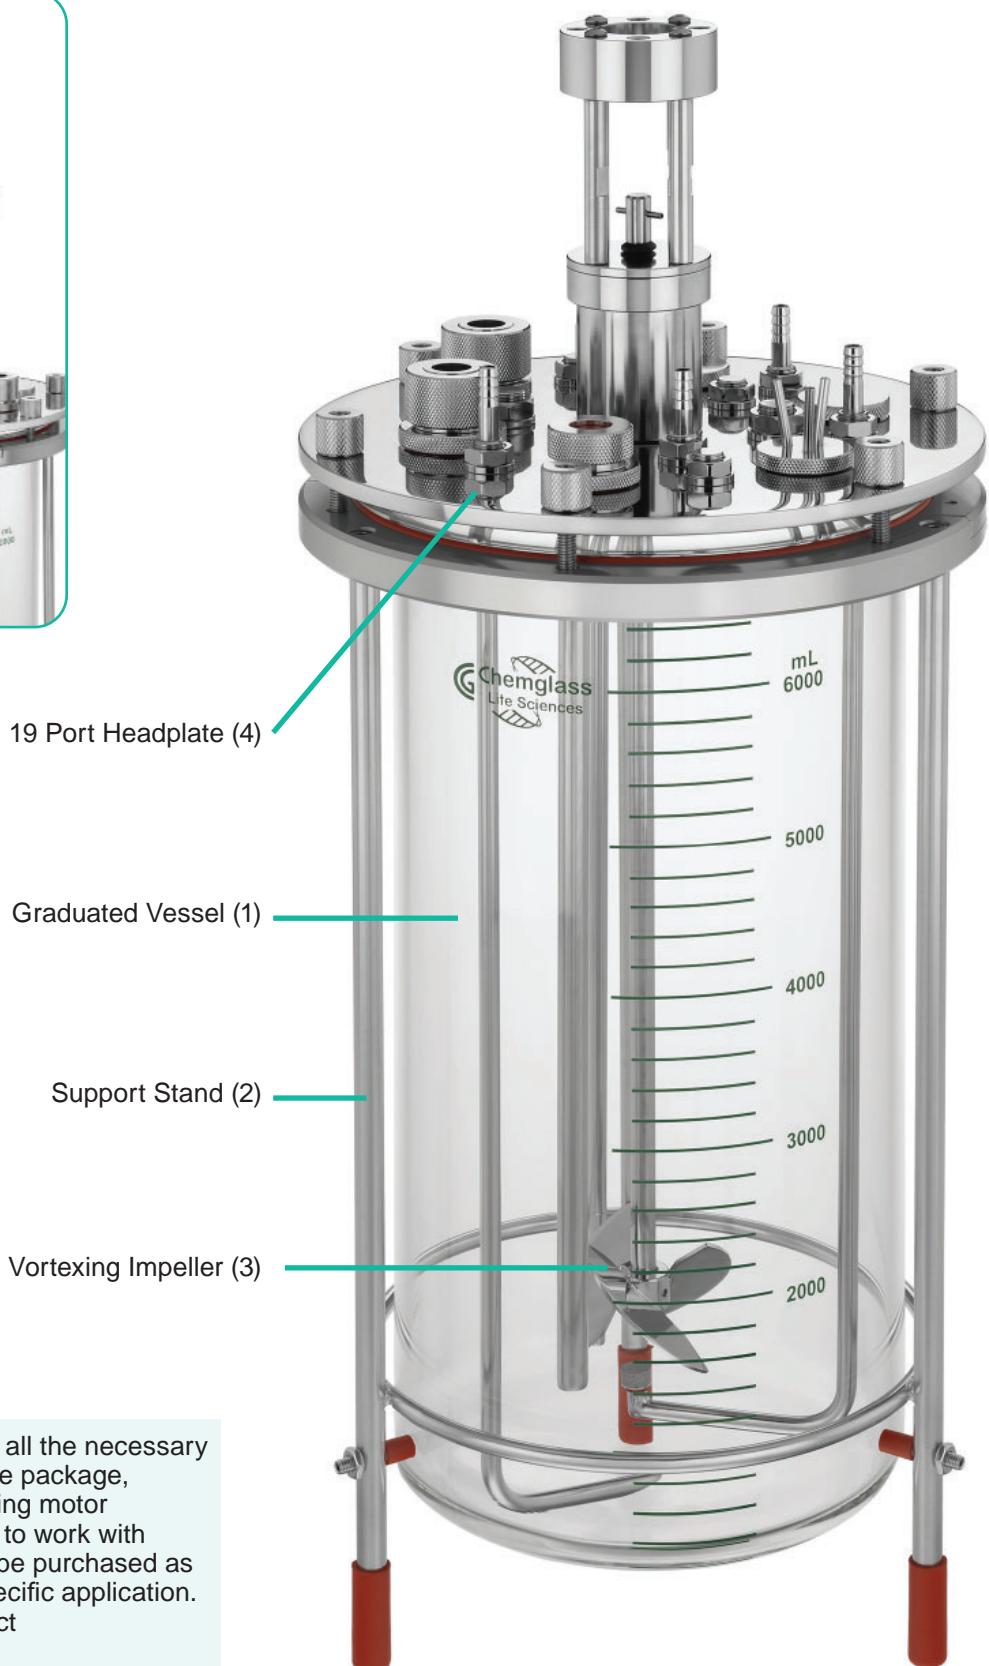

Port No.	Part No.	Size	Description
P1	CLS-1380-05	M30	Agitator Assembly
P2	CLS-1381-07	G3/4	pH/DO Adapter, for 12mm Sensor
P3	CLS-1380-10	M18	Septum Holder
P4	CLS-1380-09	M18	Triple Port Adapter
P5	CLS-1380-25	M18	Blind Stopper
P6	CLS-1380-25	M18	Blind Stopper
P7	CLS-1381-06	M18	pH/DO Adapter for 12mm Sensor
P8	CLS-1380-24	M12	Blind Stopper
P9	CLS-1380-24	M12	Blind Stopper
P10	CLS-1380-23	M10	Blind Stopper
P11	CLS-1382-12	M10	Harvest Tube
P12	CLS-1380-23	M10	Blind Stopper
P13	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P14	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P15	CLS-1380-23	M10	Blind Stopper
P16	CLS-1382-08	M10	Porous Sparge Tube, 15 um Frit
P17	CLS-1380-23	M10	Blind Stopper
P18	CLS-1380-21	M10	Adjustable Sampling Pipe
P19	CLS-1380-11	M10	Thermowell, 200mm Immersion

## Additional Items Included with CLS-1382-CC5M

Item No.	Part No.	Description
5	CLS-1399-100	Overhead Stirrer and Controller, 20VAC

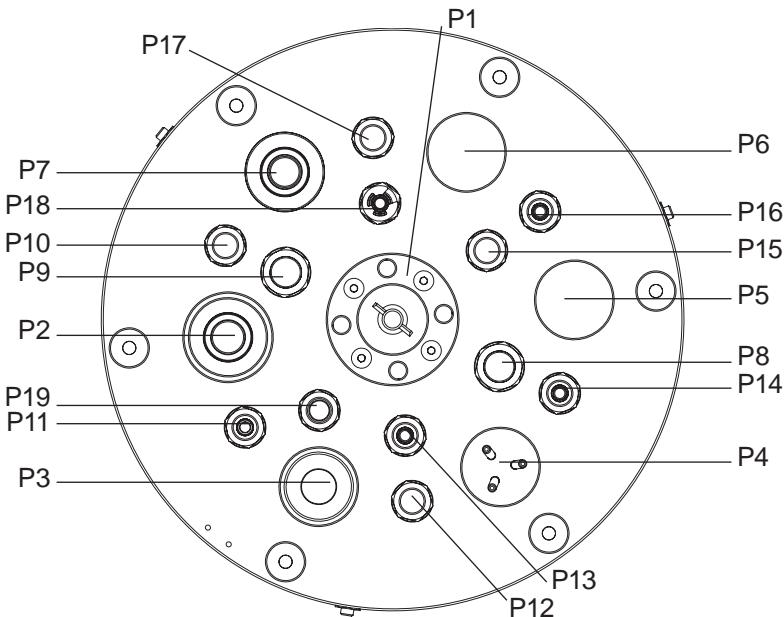

## 7L Cell Culture Bioreactor Systems, Unjacketed

Cell culture bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact

Part Number	Description	Price
<b>CLS-1383-CC7</b>	7L Cell Culture Bioreactor System Complete, Without Motor	\$9,566.35
<b>CLS-1383-CC7M</b>	7L Cell Culture Bioreactor System Complete, With Motor	\$12,553.50

#### Standard Components Supplied with Complete Systems

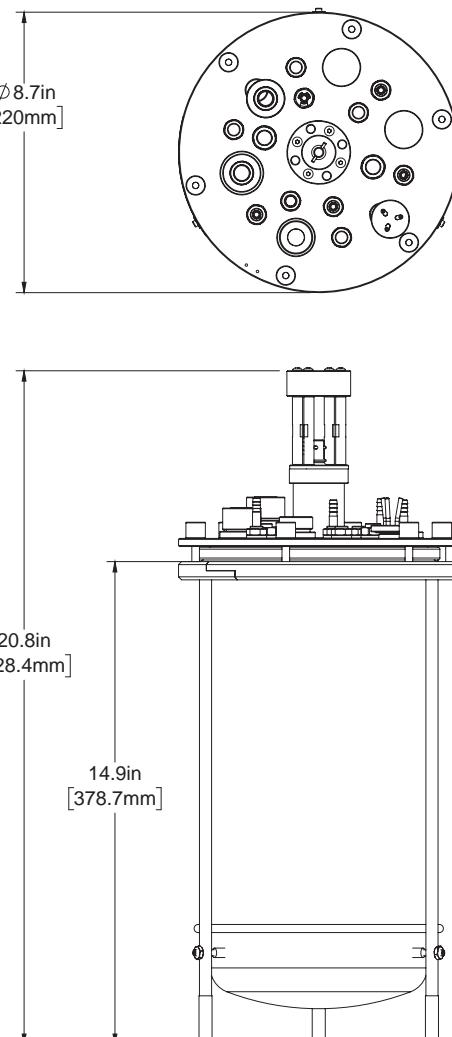

Item No.	Part No.	Description
1	CLS-1383-01	Bioreactor, 7L, Unjacketed, Graduated
2	CLS-1383-STD7	Support Stand, Complete
3	CLS-1382-05	Vortexing Impeller 59mm OD
4	CLS-1382-03	Headplate, 19 Port

#### Headplate Configuration and Components

Port No.	Part No.	Size	Description
P1	CLS-1383-04	M30	Agitator Assembly
P2	CLS-1381-07	G3/4	pH/DO Adapter, for 12mm Sensor
P3	CLS-1380-10	M18	Septum Holder
P4	CLS-1380-09	M18	Triple Port Adapter
P5	CLS-1380-25	M18	Blind Stopper
P6	CLS-1380-25	M18	Blind Stopper
P7	CLS-1381-06	M18	pH/DO Adapter for 12mm Sensor
P8	CLS-1380-24	M12	Blind Stopper
P9	CLS-1380-24	M12	Blind Stopper
P10	CLS-1380-23	M10	Blind Stopper
P11	CLS-1383-13	M10	Harvest Tube
P12	CLS-1380-22	M10	Blind Stopper
P13	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P14	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P15	CLS-1380-23	M10	Blind Stopper
P16	CLS-1383-06	M10	Porous Sparge Tube, 15 um Frit
P17	CLS-1380-23	M10	Blind Stopper
P18	CLS-1383-08	M10	Adjustable Sampling Pipe
P19	CLS-1383-05	M10	Thermowell, 300mm Immersion

#### Additional Items Included with CLS-1383-CC7M

Item No.	Part No.	Description
5	CLS-1399-100	Overhead Stirrer and Controller, 120VAC

## 15L Cell Culture Bioreactor Systems, Unjacketed

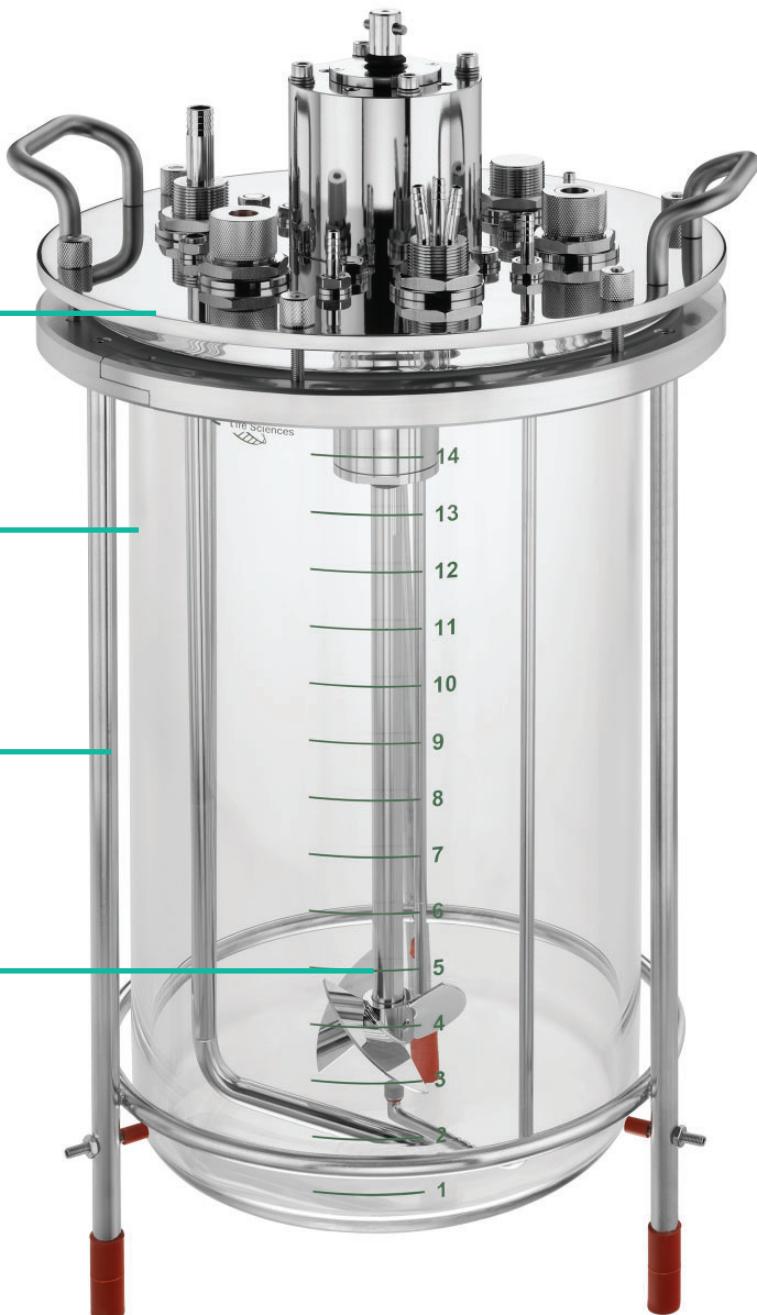

19 Port Headplate (4)

Graduated Vessel (1)

Support Stand (2)

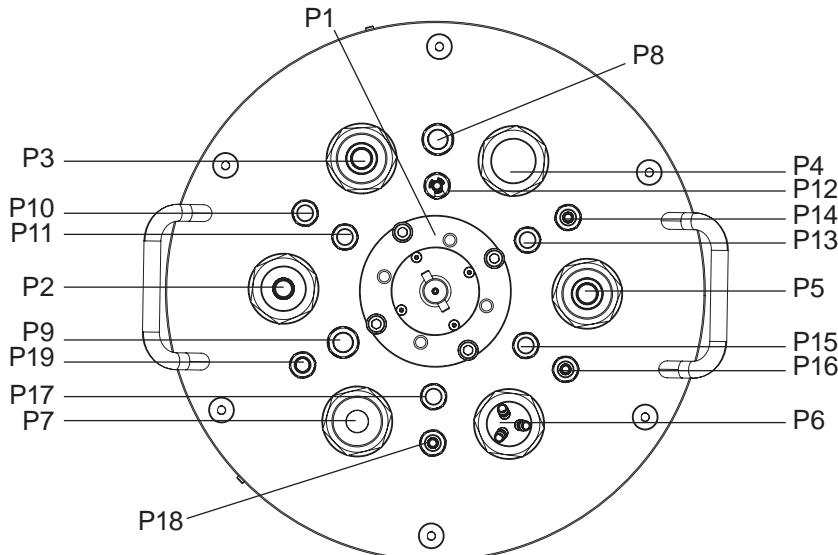

Vortexing Impeller (3)

Cell culture bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact

P11	CLS-1380-23	M10	Blind Stopper
P12	CLS-1385-13	M10	Adjustable Sampling Pipe
P13	CLS-1380-23	M10	Blind Stopper
P14	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P15	CLS-1380-22	M10	Blind Stopper
P16	CLS-1385-11	M10	Porous Sparge Tube, 15 um Frit
P17	CLS-1380-23	M10	Blind Stopper
P18	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P19	CLS-1385-10	M10	Thermowell, 370mm Immersion

## Additional Items Included with CLS-1385-CC15M

Item No.	Part No.	Description
5	CLS-1399-200	Overhead Stirrer and Controller, 120VAC

# 1L Microbial Fermentation Bioreactor System, Unjacketed

Agitator Assembly for Use with

CLS-1399-100 Overhead Stirrer.

Additional Adapters are available for other style motors.

16 Port Headplate (4)

Graduated Vessel (1)

Support Stand (2)

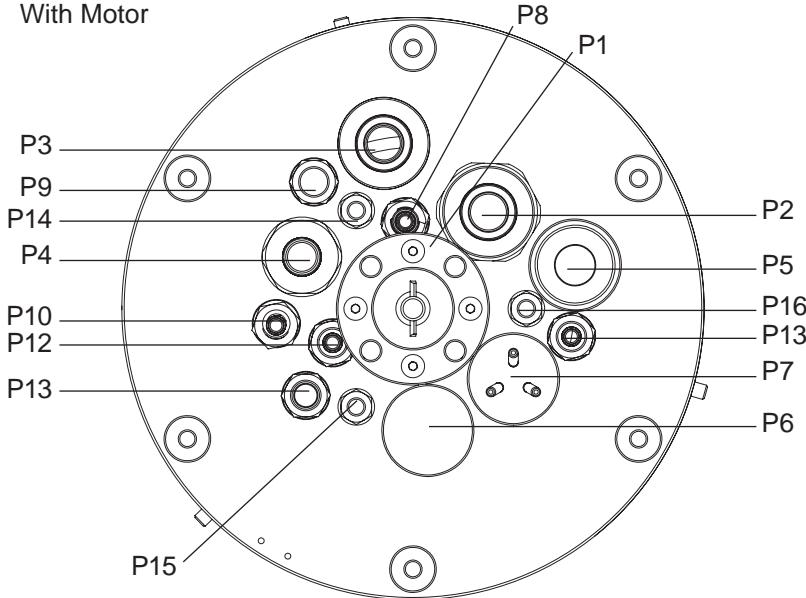

Rushton Impeller (3)

Microbial fermentation bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact [singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

# 1L Microbial Fermentation Bioreactor System, Unjacketed

Part Number	Description	Price
<b>CLS-1380-MF1</b>	1L Microbial Fermentation Bioreactor System Complete, Without Motor	\$8,035.95
<b>CLS-1380-MF1M</b>	1L Microbial Fermentation Bioreactor System Complete, With Motor	\$11,023.10

## Standard Components Supplied with Complete Systems

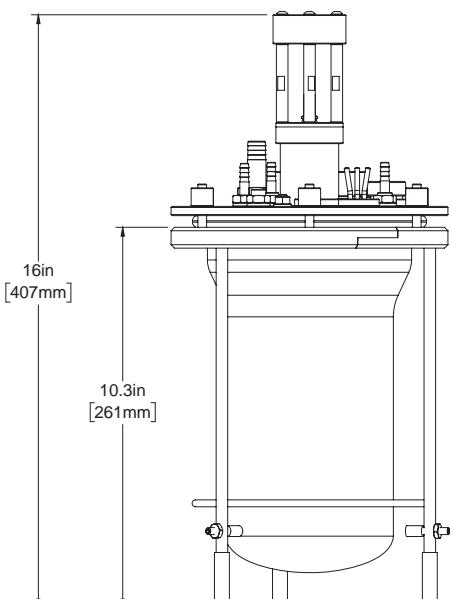

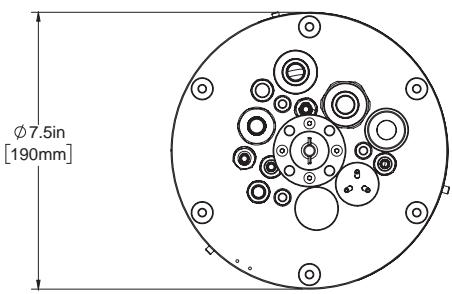

Item No.	Part No.	Description
1	CLS-1378-01	Bioreactor, 1L, Unjacketed, Graduated
2	CLS-1380-STD3	Support Stand, Complete
3	CLS-1380-08	Rushton Impeller 48mm OD
4	CLS-1379-02	Headplate, 16 Port

## Headplate Configuration and Components

Port No.	Part No.	Size	Description
P1	CLS-1380-05	M30	Agitator Assembly
P2	CLS-1381-07	G3/4	pH/DO Adapter, for 12mm Sensor
P3	CLS-1381-06	M18	pH/DO Adapter for 12mm Sensor
P4	CLS-1380-70	M18	Sampling Tube/ Harvest Tube
P5	CLS-1380-10	M18	Septum Holder

# 7L Microbial Fermentation Bioreactor System, Unjacketed

Part Number	Description	Price
<b>CLS-1383-MF7</b>	7L Microbial Fermentation Bioreactor System Complete, Without Motor	\$9,663.85
<b>CLS-1383-MF7M</b>	7L Microbial Fermentation Bioreactor System Complete, With Motor	\$12,651.00

## Standard Components Supplied with Complete Systems

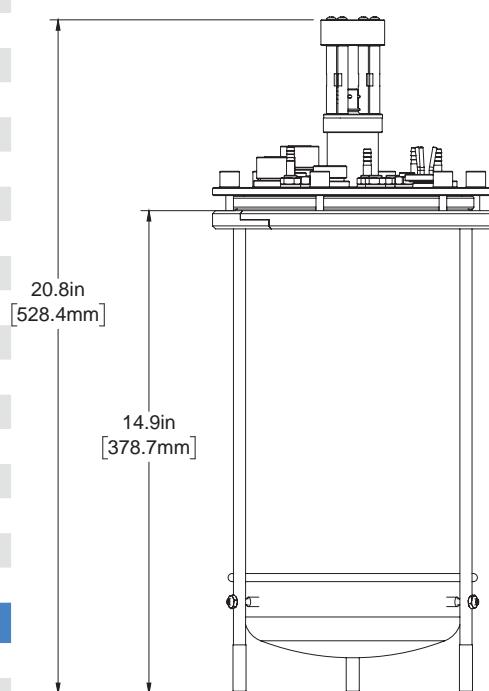

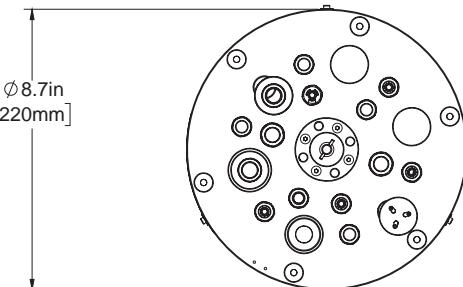

Item No.	Part No.	Description
1	CLS-1383-01	Bioreactor, 7L, Unjacketed, Graduated
2	CLS-1383-STD7	Support Stand, Complete
3	CLS-1382-07	Rushton Impeller 60mm OD
4	CLS-1382-03	Headplate, 19 Port

## Headplate Configuration and Components

Port No.	Part No.	Size	Description
P1	CLS-1383-04	M30	Agitator Assembly
P2	CLS-1381-07	G3/4	pH/DO Adapter, for 12mm Sensor
P3	CLS-1380-10	M18	Septum Holder
P4	CLS-1380-09	M18	Triple Port Adapter
P5	CLS-1380-25	M18	Blind Stopper
P6	CLS-1380-25	M18	Blind Stopper
P7	CLS-1381-06	M18	pH/DO Adapter for 12mm Sensor
P8	CLS-1380-24	M12	Blind Stopper
P9	CLS-1380-24	M12	Blind Stopper
P10	CLS-1383-11	M10	Baffle, 317mm Long
P11	CLS-1383-13	M10	Harvest Tube
P12	CLS-1383-11	M10	Baffle, 317mm Long
P13	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P14	CLS-1380-20	M10	Adapter, Air Inlet/Outlet
P15	CLS-1380-23	M10	Blind Stopper
P16	CLS-1384-06	M10	Air Aeration Tube, Drilled Hole Sprayer
P17	CLS-1383-11	M10	Baffle, 317mm Long
P18	CLS-1383-08	M10	Adjustable Sampling Pipe
P19	CLS-1383-05	M10	Thermowell, 300mm Immersion

## Additional Items Included with CLS-1383-MF7M

Item No.	Part No.	Description
5	CLS-1399-100	Overhead Stirrer and Controller, 120VAC

# 15L Microbial Fermentation Bioreactor System, Unjacketed

19 Port Headplate (4)

Graduated Vessel (1)

Support Stand (2)

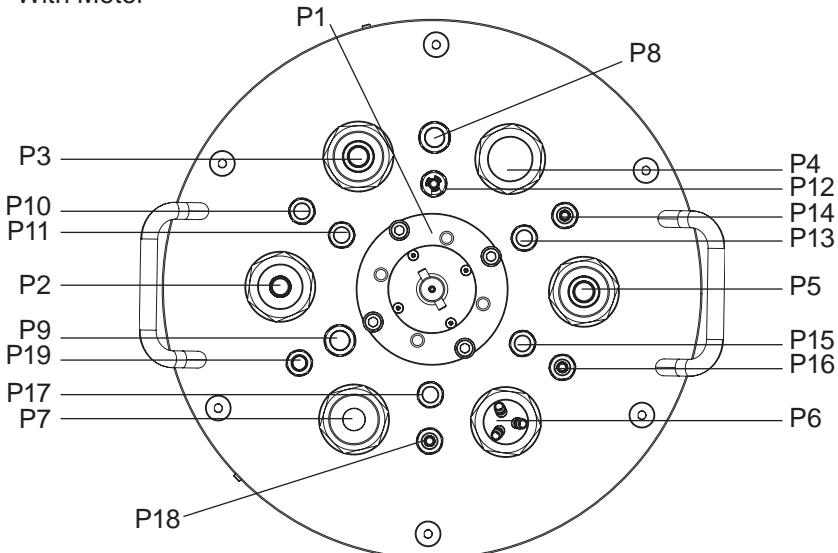

Rushton Impeller (3)

Microbial fermentation bioreactor systems include all the necessary base components needed in one simple package, supplied with or without a motor. By using motor adapters, the system can be retrofitted to work with almost any motor. These systems can be purchased as configured or customized to fit your specific application. For customized solutions please contact [singleuse@cglifesciences.com](mailto:singleuse@cglifesciences.com)

# Bioreactor Controllers and Accessories

2 Year Warranty

## Sensors

The following sensors can be connected to the HABITAT CCT System.

- pH
- DO (dissolved oxygen)
- Temperature
- Filling level
- Foam
- CO<sub>2</sub>
- Conductivity
- Turbidity
- Viable cell mass
- Redox
- Off-gas Analysis

## ika Controllers and Accessories

HABITAT is a smart benchtop bioreactor and fermenter control system from iKA, designed for both cell culture and microbial fermentation.

To operate HABITAT you only need a control unit package and a bioreactor system. For sensitive mammalian cell culture techniques, select the cell variant, with gassing rates from 8 - 2000 cc/min. For microbial fermentation, we recommend the ferment variant, with gassing rates of 100 - 20,000 cc/min. The photobioreactor version with LED panels is perfect for photosynthetic organisms.

Each package offers precise temperature control and pH control, essential for optimal cell growth and fermentation processes. The suffix 'cct' in each package indicates connection options for three additional sensors: turbidity, CO<sub>2</sub>, and conductivity, enhancing your ability to monitor cell culture media and fermentation progress.

### All features at a glance

- Compact, space-saving design, dimensions: 223 x 402 x 450mm (WxDxH)
- Latest technology sensors for better insights and more control
- Large screen tablet for easy operation (10.4 inch)
- Intuitive, easy-to-use control software that provides simple initial setup and intuitive user assistance throughout the process
- Four integrated Watson-Marlow pumps
- High precision motor speed control
- Cross platform connectivity: USB, PC, RS232, OPC-UA, ethernet, external signal input, external pump, single-use unit, thermostat
- Data storage
- Four built-in mass flow controllers for gas supply: N<sub>2</sub>, O<sub>2</sub>, air, and CO<sub>2</sub>
- Status LED display: direct error display by indicator light

## Habitat CCT Cell Culture Bioreactor Control System

Part Number	Description	Price

Chemglass Life Sciences is pleased to announce the availability of like-for-like, replacement components for the popular 2, 3, 5, 7 and 15 liter sizes of Applikon® and Broadley-James® Bioreactor. All stainless steel components are manufactured from 316L stainless steel with an electropolished surface finish of 20Ra or better. Borosilicate glass vessels include jacketed, unjacketed and red stained versions. Contact us if you require any parts not shown here.

## Unjacketed Glass Bioreactor Vessels

Vessels are constructed of heavy wall tubing and are graduated in 200mL subdivisions with numbers every 1000mL.

### Unjacketed Glass Bioreactor Vessels

## Jacketed Glass Bioreactor Vessels

Jacketed vessels are constructed of heavy wall tubing and are graduated in 200mL subdivisions with numbers every 1000mL. Connections to circulator are GL-18 glass threads and are supplied complete with caps and plastic hose connections. **15L jacketed vessels available - please contact us.**

### Jacketed Glass Bioreactor Vessels

Part Number	Vessel Cap. (L)	Vessel Min. Working Volume (L)	VesselID. (mm)	Overall Height (mm)	Price
<b>CLS-1381-01</b>	3	0.5	130	275	<b>\$1,656.25</b> ♥

<b>CLS-1384-01</b>	7	2	160	375	<b>\$2,501.20</b> ♥

## Tripod Stand For Jacketed Glass Bioreactor Vessels

Stand for jacketed bioreaction vessels. Top, two-piece ring is made of anodized aluminum. The lower ring and legs are electropolished stainless steel. Stands come complete with silicone o-ring and six, knurled nuts to attach the headplate to the stand. **Stands for 15L jacketed vessels available - please contact us.**

### Tripod Stands for Jacketed Glass Bioreactor Vessels

<b>CLS-1381-STD3</b>	2-3	CLS-1705-150X4	<b>\$1,178.15</b> ♥
<b>CLS-1386-STD5</b>	5	CLS-1705-177X4	<b>\$1,228.05</b> ♥
<b>CLS-1384-STD7</b>	7	CLS-1705-177X4	<b>\$1,277.90</b> ♥

## Stabilizer Bars For Bioreactor Stands

Bars attach to the legs of bioreactor stands with two adjustable hex head screws and add an additional measure of safety. For use with both jacketed and unjacketed bioreactor stands. Each bar has silicone pads on the ends for cushioning and added extra grip. Sold as a set of three.

- 1-3L stabilizer bars are 4" long
- 5-7L stabilizer bars are 4" long
- 15L stabilizer bars are 6" long

### Stabilizer Bars For Bioreactor Stands

Part Number	Description	Price
<b>CLS-1380-SBD3</b>	Set of Three, for 1-3L Bioreactor Stands	<b>\$320.75</b> ♥
<b>CLS-1383-SBD3</b>	Set of Three, for 5-7L Bioreactor Stands	<b>\$320.75</b> ♥
<b>CLS-1385-SBD3</b>	Set of Three, for 15L Bioreactor Stands	<b>\$333.60</b> ♥

## Replacement Silicone Feet For Tripod Stands

Replacement silicone feet for 3, 5 and 7 liter bioreactor, tripod stands. Sold as a pack of 12.

### Replacement Silicone Feet for Tripod Stands

Part Number	Description	Price
<b>CLS-1380-084</b>	For 3, 5 and 7 Liter Tripod Stands	<b>\$15.15</b> ♥

## Agitator Assemblies

Agitator assembly is constructed of 316L stainless steel and screws into the M30 thread in the center of the headplate. Design ensures contamination-free sealing around the shaft. CLS-1385-05 attaches to the headplate with 4 bolts. CLS-1385-35 requires adapter plate, CLS-1385-30, for use in a 15L reactor.

### Agitator Assemblies

Part Number	Vessel Cap. (L)	Replacement	Length of Shaft Through Headplate (mm)	Shaft Dia. (mm)	Price
		Silicone O-ring			
<b>CLS-1380-05</b>	1-5	CLS-1705-124	222	8	<b>\$1,418.80</b> ♥

### Rebuild Kits For Agitator Assemblies

Kits of o-rings, seals and bearings to rebuild agitator assemblies.

### Headplates

Part Number	Fits Agitator	Shaft Size (mm)	Price
<b>CLS-1380-05PM</b>	CLS-1380-05	8	<b>\$146.00</b> ♥
	CLS-1383-04		
	CLS-1385-35		
<b>CLS-1385-05PM</b>	CLS-1385-05	15	<b>\$230.15</b> ♥

### Applikon Agitator to Sartorius Motor Adapter Kit

Adapter kit converts our standard "Applikon-style" agitator assembly to fit a Sartorius motor. NOTE: This is the adapter kit only and does not include the agitator assembly.

### Applikon Agitator to Sartorius Motor Adapter

Part Number	Description	Price
<b>CLS-1380-SAR1</b>	Sartorius Motor Adapter Kit	<b>\$476.90</b> ♥

### IKA Motor Adaptor

Agitator Adapter to adapt IKA HABITAT motors to Applikon style agitator assemblies. Small motor adapters are for use with 1L to 5L (8mm Shaft)

Bioreactor and the big motor adapters are for use with 7L (8mm shaft) and 15L (8mm shaft or 15mm) agitator assemblies.

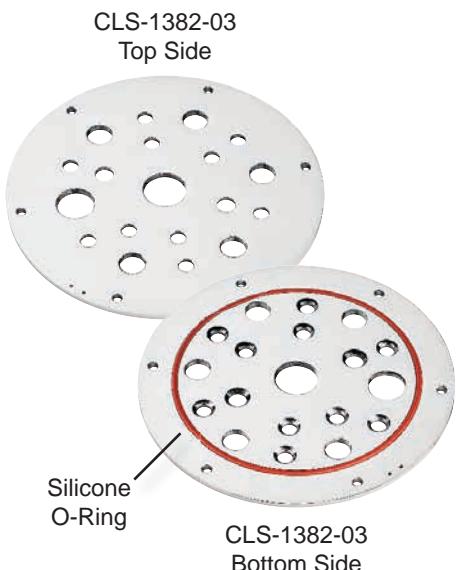

**Note:** This is the adapter kit only and does not include the agitator assembly. For the 8mm agitator assemblies' removal of the (4) rods and upper motor support portion is required. The adapter screws into the mounting holes used by the rods. For the 15mm agitator assembly (4) existing screws on the top plate will need to be removed and the adapter will screw in using these holes.

### IKA Motor Adaptor

Part Number	Description	Price
<b>CLS-1380-IKA2</b>	Applikon Agitator to IKA HA.mt.s.2 Small Motor Adapter Kit	<b>\$462.30</b> ♥

## Adapter Plate, 15L Bioreactor To M30

For conversion of the 15 liter headplate, CLS-1385-03, from a 69mm opening to an M30 thread, thereby accepting the CLS-1385-35 agitator assembly.

### Adapter Plate for 15L Headplates

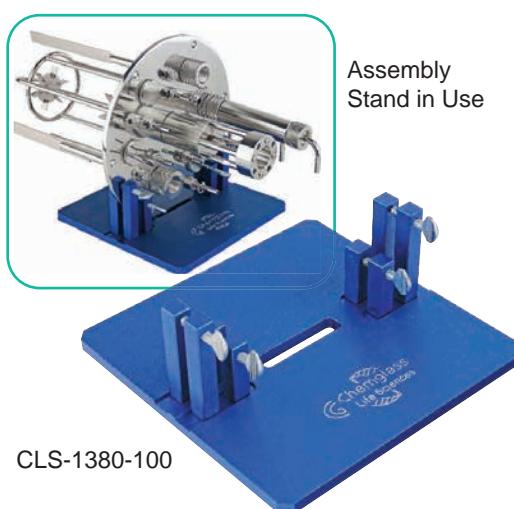

Part Number	Description	Price
<b>CLS-1385-30</b>	Adapter Plate, M30	<b>\$504.35</b> ♥

## Headplate Assembly Stand

Constructed of blue anodized aluminum, stand permits easy assembly of components into headplates. Will fit from 2 to 15 liter headplates, which are secured with four nylon-tipped thumb screws. Plate is 8" wide by 8" deep. Distance between uprights is 8mm.

### Headplate Assembly Stand

Part Number	Description	Price
<b>CLS-1380-100</b>	Headplate Assembly Stand	<b>\$614.90</b> ♥

## Marine Style Impeller Blades

Marine style impeller blades are available in two styles, vortexing and scoping. The 2 through 7 liter sizes fit the 8mm shaft of the agitator assembly. The 15 liter has an option of either the 8mm or the 15mm shaft size. These blades are used primarily for mammalian cell culture work.

### Marine Style Impeller Blades, Scoping and Vortexing

Part Number	Impeller Type	Fits		Fits

## Triple Port Adapter, M10

316L stainless steel triple port assembly fits into a 10mm head port plate. The assembly incorporates three separate pipes into one assembly for efficient use of space. Each port can be used individually for reagent addition. M10 threaded adapter has (3) 1/8" OD tubing ports for connection to flexible tubing. Inside the reactor the tubes are 7mm long; above the headplate they are 1.59", 2.09", and 2.59" long. Electropolished to Ra20 or better.

### Triple Port Adapter, 1/8" OD Tubing

Part Number	Thread Size	Replacement Silicone O-Ring	Price
CLS-1380-323	M10		\$762.20 ♥

## Double Port Adapter, M18

Double port adapter fits into a headplate and has two, 4mm OD, connections to fit precision tubing size 16. Inside the reactor, the 4mm tubes are 1 1/4" long.

### Double Port Adapter

Part Number	Thread Size	Replacement Silicone O-Ring	Price
CLS-1380-57	M18	CLS-1705-20x2	\$311.25 ♥

## Triple Port Adapters, M18 And M27

Triple inlet adapter fits into a headplate and incorporates three separate pipes in one assembly for efficient use of space. The adapter has three, 1/8" (3.2mm) tubing ports for connection to flexible tubing and can be used individually for reagent addition. Inside the reactor, the 1/8" tubes are 3/4", 1" and 1 1/8" long.

### Triple Port Adapter

Part Number	Thread Size	Replacement Silicone O-Ring	Price
CLS-1380-09	M18	CLS-1705-20X2	\$348.50 ♥
CLS-1385-08	M27	CLS-1705-121	\$605.80 ♥

## Quad Port Adapters, M18

Quad inlet assembly fits an 18mm head plate port and incorporates four separate pipes in one assembly for efficient use of space. Each port can be used individually for reagent addition. M18 threaded adapter has (4) 1/8" (3.2mm) tubing ports for connection to flexible tubing. Inside the reactor, the 1/8" tubes are 5/8", 3/4", 1" and 1 1/8" long.

### Quad Port Adapter

Part Number	Thread Size	Replacement Silicone O-Ring	Price
CLS-1380-409	M18	CLS-1705-20X2	\$358.80 ♥
CLS-1380-411	M18	CLS-1705-20X2	\$400.40 ♥

## 5-Port Adapter, G 3/4 Thread, Straight 1/8" Ports, Stainless Steel, For Bioreactor

The 5-Port inlet assembly fits into G 3/4 head plate port. The assembly incorporates five separate pipes into one assembly for efficient use of space. Each port can be used individually for reagent addition. G 3/4 threaded adapter has (5) 1/8" (3.2mm) tubing ports for connection to flexible tubing. Inside the reactor, the 1/8" tubes are 1/8" long

### 5-Port Adapter

Part Number	Thread Size	Replacement Silicone O-Ring	Price
<b>CLS-1380-500</b>	G 3/4	CLS-1705-023	<b>\$411.55</b>

<b>CLS-1383-11</b>	7	M10	CLS-1705-85X25	<b>\$307.05</b> 
<b>CLS-1385-17</b>	15	M10	CLS-1705-85X25	<b>\$464.65</b> 

## Air Aeration Tube, Drilled Hole Sparger, M10

This tube is to be used when high gas flow rates are required. The sparger pipe extends to the bottom of the vessel and terminates just below the impellers on the stirrer shaft. This allows bubbles coming out of the sparger to rise up into the impellers where they are broken up for improved oxygen transfer.

### Air Aeration Tube, Drilled Hole Sparger, M10

Part Number	Fits Reactor (L)	Length of Tube	Replacement Silicone O-Ring	Price
		Below the Headplate (mm)		
<b>CLS-1379-06</b>	1-2	226	CLS-1705-85X25	<b>\$315.40</b> 
<b>CLS-1381-05</b>	3-5	238	CLS-1705-85X25	<b>\$340.30</b>

## Diptube Assembly, 1/2" Sanitary, M18, Stainless Steel

316L stainless steel diptube assembly with 1/2" sanitary fitting on top and fits into an 18mm head port plate. The length inside the bioreactor is 7.66". The overall length is 9.87". Electropolished Ra20 or better.

### Diptube Assembly, 1/2" Sanitary

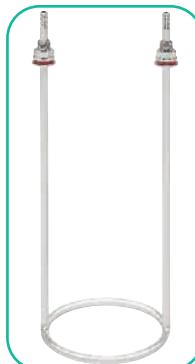

Part Number	Thread Size	Immersion Length (in)	Price
<b>CLSI-1380-75</b>	M18 x 1.5	7.66	<b>\$415.20</b> 

## Heat Exchangers

Heat exchangers are available in a choice of two different styles. The cold finger style is for use with 2 - 5 liter reactors and fits into the headplate via an M18 threaded port. The second style is a loop type exchanger and is available for 5 - 15 liter reactors. It fits into two, M10 ports of the headplate.

### Heat Exchangers, Cold Finger and Loop Styles

Part Number	Fits Reactor (L)	Exchanger Style	Replacement Silicone O-Ring	Price

## Hamilton DO Probes To Fit Bioreactor

The OxyFerm FDA is an electrochemical oxygen sensor suited for applications with high demands for hygiene, e.g. in pharmaceutical industry, in biotechnology and in foods and beverages production. When using Oxylyte USD electrolyte, even upside-down insertion is possible. The sensor is equipped with a FDA approved membrane for usage in hygienic processes.

### Specifications

<b>Electrode System</b>	Silver Platinum Combination
<b>Polarization</b>	670mV ± 50mV
<b>Output</b>	40 to 80nA in Air at 25°C
<b>Temperature</b>	0-130°C, Sterilization to 130°C
<b>Drift at Room Temp Under Constant Conditions</b>	<1% per Week
<b>Stabilization Time</b>	<2 Hours
<b>Pressure</b>	0-4 Bar
<b>Wetted Materials</b>	Stainless Steel 1.4435, EPDM and Silicone with FDA Approval

## Hamilton pH Probes

The EasyFerm Plus K8 sensors are designed to withstand demanding applications in pharmaceutical and chemical industries. The EVEREF-F reference cartridge ensures that the pHemlyte reference electrolyte remains free of silver and precipitation. The EasyFerm Plus K8 is supplied with a pre-sterilized electrolyte which prevents the diffusion of sample into the sensors. It withstands steam sterilization, autoclaving, CIP, organic solvents and strong acids. Fully autoclavable or in-situ sterilizable.

### Specifications

<b>pH Range</b>	0-14
<b>Electrolyte</b>	Pressurized pHemlyte
<b>Pressure Range</b>	0-6 Bar
<b>Electrical Connector</b>	Type K8 - Standard pH Connector Head or VP
<b>Reference System</b>	HAMILTON EVEREF-F, Silver ion barrier included
<b>Temperature Range</b>	Steam Sterilizable/Autoclavable to 266°F (0 to 135°C)
<b>In-situ Sterilization</b>	Up to 100 Cycles under Standard Conditions

<b>CLS-1455-R1</b>	pH and DO Probe Rack	<b>\$195.30</b> ♥

## Hamilton VisiFerm Optical DO Probes

The VisiFerm DO is the first optical oxygen sensor with integrated opto-electronics, having the full functionality of a measuring device with self-diagnostics. It is steam sterilizable, autoclavable and CIP compatible. The VisiFerm requires less maintenance than a classical oxygen sensor as it does not have a mechanically sensitive membrane or a corrosive electrolyte.

### Advantages of Optical Measurement

- More accurate measurement because optical sensors do not consume oxygen.
- Without electrolyte the sensor reading is not affected by mounting orientation.
- Quicker response time results in less wasted product.
- Improved mechanical and measurement stability with a glass window.
- Signal is not influenced by electrostatics and mechanical stress.
- No impact on measurement or sensor life due to H2S fouling.

### Specifications

<b>Measuring Principle</b>	Oxygen dependent luminescence Quenching
<b>Measuring Range</b>	4ppm to 25ppm
<b>Response Time</b>	< 30 seconds at 25°C
<b>Autoclavable</b>	Yes
<b>Steam Sterilizable</b>	Yes (Max 140°C)
<b>Pressure Range</b>	-1 to 12 Bar
<b>Probe Diameter</b>	12mm
<b>Connection to Process</b>	PG 13.5 Thread
<b>Electrical Connection</b>	VP8
<b>Wetted Materials</b>	SS 1.4435, Silicone EPDM

## Heating Blankets, 110V with Velcro®

Manufactured to fit snugly around Applikon®-style, unjacketed vessels to supply uniform heat. Made of silicone rubber, all sizes are 110VAC with the wattage as listed. Velcro allows easy installation, even with the vessel in a support stand. Plugs are IEC standard 2-prong.

**Please Note:** These Heaters Cannot Be Directly Plugged Into a Wall Receptacle and Require a Temperature Controller with a Thermocouple or RTD in Order to Properly Maintain and Reach a Controlled Temperature

## Temperature Controllers, J-Kem®, Model 210

The Model 210 has 1200 Watts of power which is sufficient for heating blankets. Controller has the ability to display temperature without heating.

### Specifications:

**Dimensions:** 3.25" H x 5.25" W x 7.25" D

**Power:** 10 Amps @ 120VAC, 1200 Watts

### Molded Adapter Plug

Part Number	Description	Price
<b>CG-3200-100</b>	J-Kem® Temperature Controller Only, Model 210, Type "RTD" (-200°C to 400°C)	<b>\$1,178.00</b> ♥

## 10' Coiled Extension Cords, White, RTD

For use with CG-1978-P Series RTD sensors.

## Addition and Sampling Vessels

Addition and sampling vessel with hose barbed 2-port drip tube assemblies designed for addition or sampling of media, acid or base. Drip tube assemblies are constructed of 316L electropolished stainless steel and include blue polypropylene GL-32 open top caps with white silicone gaskets. Drip tubes have a finish of 20Ra or better. The vessel measures 32mm Diameter x 94mm OAL.

## Condensers, Glass and Stainless Steel

Condensers aid in removing moisture from exhaust gases which can clog filters. They also help minimize loss of material from the bioreactor due to evaporation during fermentation. Glass condensers are available in bulb and coil styles and are more economical than stainless steel. Stainless steel condensers consist of four components: jacketed condenser body with two 1/4-inch hose connections; internal stainless steel baffle; 90° gas outlet tube with 1/4-inch hose connection; threaded compression nut. Condensers are connected to Bioreactor by use of 12mm, adjustable height, probe adapters, CLS-1381-06 or CLS-1381-07 which are sold separately.

### Condensers, Glass and Stainless Steel

Stainless Steel Condenser with Internal Baffle

## Stirrers, Complete, Bioreactor

Stand alone stirrer fits Applikon®-style vessels from 1 to 5 liters. The motor has incredible power for its size, 91 in-oz. The control box is extremely small, measuring only 3.5" wide x 4.5" high x 2.5" deep, and includes a clamp that allows it to be attached to reactor support legs up to 14mm in diameter. Unit also has a RS-232 port for PC control and data logging.

### Specifications

<b>Fits Applikon-Style Vessels</b>	1-5 Liters
<b>Speed Range</b>	20-800 RPM
<b>Power</b>	91 (in-oz.)
<b>Voltage Requirements</b>	110 to 240 VAC, 50-60 Hz
<b>Wattage</b>	240 Watts Max, Peak 2 Amps
<b>Operating Temperature Range</b>	5 to 40°C

## Single-Use Bioreactor Accessory Kits Ready for Sterilization

### Single Use

- Minimize labor costs
- Eliminates cleaning validation
- Reduces set up time and costs

### Pre-Fabricated Assemblies

- Minimize injuries associated with cutting in-house
- Improved consistency

### Offers Closed System

- Gives the ability to assemble in open lab type environment
- Provides aseptic solution to close off an unused line

### How to Sterilize

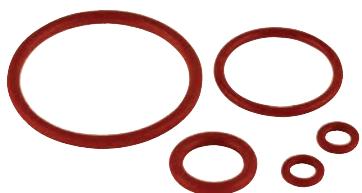

- Autoclave max 15 psi @ 134°C, 60 min
- $\gamma$  radiation 25 kGy to 50 kGy

## 10mL Bioreactor Syringe Sample line with Luer Lock Connections

- The Sampler uses all Luer style connections, eliminating any needle sampling and risk of puncture injuries.
- No valves. The sampling valve is opened by the attachment of the sampling syringe and automatically closes once the syringe is removed.
- Use with any type of cell culture sampling such as spinner flasks, bioreactor or bags.
- Sampler is set up with a check valve that eliminates the chances of contamination.
- Supplied with 4" length of USP Class VI L/S® Platinum Cured Silicone Pump Tubing, 1/8" ID x 1/4" OD Size 16.
- NOTE: The sampler is supplied assembled, but not sterilized. It must be autoclaved prior to use. Syringes are individually sterile strip packed.
- 10mL Bioreactor Syringe Samplers with Luer Lock Connections.

## Safety

All luer-style connections make for safe sampling.

Part No.	Syringe Vol. (mL)	Qty.	Price
CLS-1399-A-01	10	10	\$327.50 *

## Universal Line Assembly, Non-Sterile

The assembly consists of a 5" Length of USP Class VI L/S® Platinum Cured Silicone Pump Tubing, 1/8" ID x 1/4" OD Size 16, a 25mm polypropylene body with 0.22µm PTFE syringe filter and blue polypropylene tubing clamp. Universal line assembly is individually bagged and ready to use. Use as a media inlet assembly, sparger line assembly or overlay gas assembly. For sterile applications the assembly can be safely autoclaved.

Part No.	Description	Qty.	Price
CLS-1390-11	Universal Line Assembly	1	\$23.55 *

All Assemblies and Kits are assembled in a Class 7 Cleanroom

## Condenser Vent Line Assembly, Non-Sterile

- Polypropylene housing with stepped barbed connections

The assembly consists of 3" of USP Class VI SILCON® MED-X 50A Platinum Cured Silicone tubing 1/4" ID x 3/8" OD Size 17 with a 50mm 0.22µm PTFE filter with a 1/4"-3/8" stepped barb. For sterile applications the filter can be safely autoclaved up to 30 times. Each filter is identified with a part number and heat stamped with a lot number and is individually bagged and ready to use.

Part No.	Description	Qty.	Price
CLS-1390-12	Condenser Vent Line Assembly	1	\$67.20 *

## Sample Line Assembly, Non-Sterile

The assembly consists of a 9" Length of USP Class VI L/S® Platinum Cured Silicone Pump Tubing, 1/8" ID x 1/4" OD Size 16 with a swabable valve and blue polypropylene tubing clamp. The valves are DEHP free, made with ISO-10993 materials, and not made with natural rubber latex. Bodies are made with BPA-free materials and polycarbonate. The valves mate securely with standard ISO-594 compliant syringes and connectors. Sample line assembly is individually bagged and ready to use.

## Perfusion Cell Culture

For perfusion applications Chemglass Life Sciences has designed a versatile platform easily configurable to your application. Perfusion vessels and stands utilize all the same components as the standard bioreactor.

### Stand For Unjacketed Glass Perfusion Bioreactor Vessels

Stand to hold unjacketed perfusion bioreaction vessels. Top, two-piece ring and lower support base are made of anodized aluminum while the legs are electropolished stainless steel. Stands come complete with silicone O-ring and six knurled nuts to attach the headplate to the stand.

Part Number	Vessel Cap. (L)	Height (mm)	Price
CLS-1380-STD3P	3L	401	\$1,733.15

CLS-1382-50	Adapter, 30mm Tool-Free to 3/4" Sanitary	\$410.80

## Custom Carts and Stands

Chemglass Life Sciences can manufacture custom designed mobile handling carts for bioreactor

### Custom Carts and Stands

- Stainless steel construction
- Designed for easy cleanability
- Mobile locking casters
- Optional spill trays
- Multiple methods of securing reactors to stands
- Can be designed to handle attached feed bottles
- Custom height and widths to meet your needs

### Custom Carts & Stands

**CG-1177 Heidolph Hei-FLOW Peristaltic Pumps**

Hei-FLOW stands for precise and sturdy peristaltic pumps providing reliable results for both pumping and dosing. Exchangeable modular pump heads allow a low-pulsation operation with up to 12 channels. Hei-FLOW peristaltic pumps are versatile, whether intended for manual operation or completely automated, and thus are indispensable high performers

# BIOFACTORIES

## Sterile, Wide Mouth, Biofactories™ with Filter Vent Caps

- Packed in double-layer sterile bags.
- Clear lot numbers for batch traceability.
- Ultrasonic welding process without any chemical addition.
- Surface TC treatment ensures efficient cell attachment.

NEST Biofactory™ systems make maximum use of the culture area available in a limited amount of space. They're useful for industrial scale production of vaccines, monoclonal antibodies and in biopharmaceutical production. Also suitable for adherent cell culture.

### Wide Mouth Biofactories with Filter Vent Caps - Tissue Culture Treated

Part No.	No. Of Layers	Total Culture Area (cm <sup>2</sup> )	Qty.	Reg. Price	SALE Price

Manufactured in dedicated 10,000-class clean rooms following GMP standards to ensure product quality and stability.

In-house E-beam sterilization meets the ISO13485 and ISO 11137:2006 standards and achieves sterility level SAL = 10-6.

Compatible with Corning® CellSTACK® culture chamber accessories.

CLS-1314

- Extremely Compact
- Fits in most CO<sub>2</sub> incubators.

## BelloCell® High Density Cell Culture System Complete

- Includes a BelloStage® compressor, and necessary accessories.
- Extremely compact system fits in most standard CO<sub>2</sub> incubators.
- Controller with large bright display and large touch panel.
- Easy to read and operate.
- Suitable for batch or semi-batch operation.
- Suitable for most protein and monoclonal antibodies production applications.

The BelloCell® Cell Culture System Complete contains all the necessary elements for users to start cell culture. It is designed to support four BelloCell® -500 bottles with a 8.6" x 11.7" foot-print and fits inside a standard CO<sub>2</sub> incubator. It contains a BelloStage® console with a magnetized controller, which can be conveniently mounted and accessed from the outside of the incubator. One-year warranty on equipment.

## BelloCell® Continuous System Complete

- Each bottle connects with an independent media reservoir to eliminate cross-contamination.
- Programmable and ON / OFF pumping control simplifies the setting of recirculation rate for each bottle.
- One BelloFeeder® pump module operates up to 4 pump heads with individual micro-processor control.
- Suitable for cell mass production, cell component production, virus production or protein expression.

The BelloCell® Continuous Cell Culture System Complete provides similar features to the BelloCell Cell Culture System Complete but with an additional BelloFeeder® pump and tubing sets to provide continuous media exchange in the BelloCell® - 500P bottles.

Each BelloCell® - 500P bottle has additional inlet and outlet line for media recirculation. Each bottle can link to an extra glass media vessel (not included) and provide continuous exchange of nutrient, eliminating the need for media exchange and avoiding possible shock to the cells during culture.

### Each Package Contains:

- 1 BelloStage® - 3000 Compressor
- 1 BelloFeeder® Pump Module
- 2 Complete Tubing Sets
- 1 GlucCell® Glucose Meter
- 50 Glucose Test Strips
- 1 CD/Manual

One-year warranty on equipment.

# Bioreaction Centrifuge Tubes

## Sterile, Bioreaction Centrifuge Tubes, 50mL, NEST

- USP VI polypropylene tubes with HDPE caps
- Packaged in sterile, zip-sealable bags
- Non-pyrogenic, non-cytotoxic, DNase- and RNase-free, human DNA-free

Bioreaction tubes offer a convenient and economical option for suspension cell culture. Bioreaction tubes include vent caps for gas exchange; 0.22µm hydrophobic membranes are welded in. These tubes provide an environment perfect for small scale suspension culture or biological reaction experiments that require aseptic conditions with free gas exchange.

## Sterile Bioreaction Centrifuge Tubes

Part No.	Cap. (mL)	Qty.	Reg. Price	SALE Price
CGN-4285-050	50	100	<del>\$167.35</del>	<b>\$133.88</b> ♣

## Sterile, Bioreaction Centrifuge Tubes, 15-50mL, CELLTREAT

Bioreaction tubes offer a convenient and economical option for suspension cell culture. Bioreaction tubes consist of centrifuge tubes with a 0.22µm hydrophobic membrane in the vent cap. These tubes provide an environment perfect for small scale suspension culture or biological reaction experiments that require aseptic conditions with free gas exchange.

Bioreaction centrifuge tubes are available in 15 and 50mL conical bottom and 50mL self-standing sizes. The tubes feature a large, white marking area. Maximum RCF is 12,000g for 15mL tubes, 16,000g for 50mL conical bottom tubes and 6,000g for self-standing tubes.

## Shaker Rack for 50mL Bioreaction Tubes

- Stainless steel construction
- Angle adjustment of up to 30°
- Silicone gasket holds tubes securely
- Can be used with skirted or standard tubes
- Fits all shakers with a top plate of at least 14" x 14"

Our unique 49-position shaker rack for 50mL bioreaction tubes is an ideal platform for high throughput experiments for screening and process optimization. The rack allows the tubes to be placed at an optimum angle (up to 30°) for both oxygenation and finding the correct fluid motion, eliminating the need for excess agitation. The silicone insert secures the tubes in the rack and prevents damage to the tubes and rotational slippage.

Rack supplied with four attached pegs which fit directly into the top of CLS-4021-100 Orbital shaker. Can also be used with other orbital shakers using CLS-4008-T03 double faced tape. *Purchase tubes separately.*

## Multipurpose Versa-Orb Digital Orbital Shakers

Built for versatility and performance, this multipurpose shaker base features a space-saving, low-profile design ideal for agitation of gels, staining, de-staining and assay development. The peg-and-grommet-type top plate accepts a variety of easily installed trays and is compatible with similar trays on the market. Speed, controlled by a rotary knob with convenient locking ring, is adjustable from 10 to 350rpm and is indicated in a bright, digital display. The shaker boasts a 1-inch orbit and a maximum load of 25lbs. Low-maintenance, 24V DC brushless motor features a detachable power supply. Two-year warranty included. Trays with liners are sold separately.

## Sticky Pads - An ideal alternative to flask clamps.

Great for securing containers with flat wide bases to shaker platforms especially those that cannot be held with traditional clamps. With shake flasks the pad can be used at speeds up 200 or 300 rpm (see chart on our website), from -30 to 70°C. It can be regenerated for reuse by simply washing with mild detergent and water. Sticky Pad cannot be used in water baths. Contact us about special, smaller sizes.

**Stackable,  
Space-Saving  
Design**

Large Capacity CO<sub>2</sub> Incubator Shakers feature Temperature, Shaking, CO<sub>2</sub> Concentration, and Humidity controls. Its stackable design helps maximize floor space, with the capability to stack up to three units high.

See our website for more information and complete specifications.

## LARGE CAPACITY Stackable Incubator Shaker with CO<sub>2</sub> Controller and Touch Screen

### High Resolution, 7-inch, Capacitive Touch Screen

- Clear, concise instrument status and functions
- Responsive and durable

### Large Capacity Chamber (190L Volume)

- Hold up to six, 5L Erlenmeyer shaker flasks

### Convenient Pull Out Rail Platform Operation

- Single, centrally-located locking handle

### Excellent Temperature Control Performance

- At a stable temperature of 37°C, the uniformity is  $\pm 0.2^\circ\text{C}$

### Chamber Cooling Capacity to 20°C Below Ambient

- Lowest temp is 4°C

### Energy-Saving Inverter Compressor

- Makes cooling a noiseless, durable, and highly efficient

### Three Units Can Be Stacked

- Purchased as a single, double or triple stack

### Bi-Directional UV Light Sterilization

- Two sets of components reach all areas of the chamber

### Ultra-Quiet Design

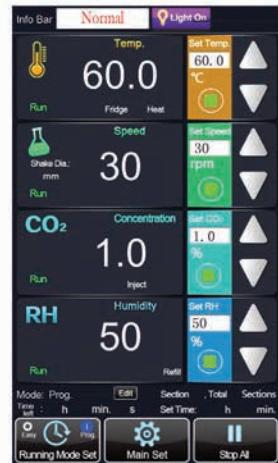

- Noise level less than 55dB when incubator is running and cooling (loudest process)

### Slow Acceleration / Deceleration

- Prevents large shear forces on the bacteria or cells

### High Pressure Water Rinse - Fast and Efficient

- Integral drain system for platform and chamber

Large Capacity CO<sub>2</sub> Incubator Shakers feature Temperature, Shaking, CO<sub>2</sub> Concentration, and Humidity controls. Its stackable design helps maximize floor space, with the capability to stack up to three units high.

See Part No. Series' CLS-2451 through CLS-2456 for General Purpose Incubators on our website

## N-BIOTEK Multi-Function Shaking Incubators

These CO<sub>2</sub> shaking incubators are recommended for use in the field of biology, proteomics, genomics, cell biology, and drug discovery, primarily used to culture suspension cells. Six side direct heating keeps the temperature in the chamber consistent. Dual beam IR CO<sub>2</sub> sensor detects CO<sub>2</sub> in the chamber which maintains the concentration precisely. Humidity is applied as a spontaneous humidity way which can minimize the speed of the medium's dry. These shakers allow you to individually control three shakers separately. 2 year warranty.

- CO<sub>2</sub> Incubators
- SHAKING Incubators
- CO<sub>2</sub> SHAKING Incubators
- REFRIGERATED Incubators (vertical type)
- GENERAL Incubators
- HYBRIDIZATION Incubators

### High Volume, Digital, Magnetic Stirrers

High Volume magnetic stirrer has a bright digital display to accurately set the stirring speed. SpeedServo™ ensures constant speed even when the viscosity changes. Magnetic stirrers have been designed and manufactured in compliance with the following standards CE, CSA and UL. The MSL Series is designed for high volume stirring/mixing of water-like solutions. Main Applications: High volumes preparations, cell cultures and tissue cultures (with spinner flasks), buffer solution preparations.

#### Versatility

- Brushless motors provide continuous operation for high volumes at any speed.
- Clear, white number, LCD displays ensure accurate speed settings.

#### Safety

- Gentle start and low speed stirring (20rpm) to protect your samples.
- The control panel is protected from liquid spills.
- Stainless-steel covers allow easy visualization of particles and color changes.
- Safety locks avoid possible unintentional changes.
- Designed for long lifespan and guaranteed by 3-year warranty.

#### Exclusive Performance

- SpeedServo™ technology maintains constant speed.
- Programmable operation thanks to the integral timer (1 to 99 min).
- Auto reverse of the stirring direction (5s to 99min 55s).
- Intermittent mode option enhances programming capabilities to match any application.
- Nemko mark indicates compliance with CSA and UL standards.

#### High Volume, Digital Magnetic Stirrers, 50-60hz, 100-240V

## Magnetic Stirrers

Accept up to 5 liter flasks

CG-2000-V10

### Digital Magnetic Stirrer with Timer, Low Profile, VELP

#### Reliable and Precise

- On board timer for unattended operation
- Auto reverse of the stirring direction to ensure better mixing
- SpeedServo™ technology maintains stirring speed during viscosity changes

#### Robust Structure and Compact Design

- Equipped with a brushless motor
- Technopolymer case guarantees high resistance to chemicals
- White surface for easy visualization of particles and color changes

The MST is a compact, low profile, digital stirrer with a **manually adjustable speed range of 80-1500 rpm**. The bright, digital display allows for very accurate setting of the stirring speed which is adjustable in 10 rpm increments. SpeedServo™ Technology provides for constant stirring speeds even during viscosity changes.

### Digital Magnetic Stirrer with Timer

## DURA-MAG™ Magnetic Stirrer

### Two, Five, and Nine Positions

Dura-Mag™ digital, front-end, magnetic stirrers are designed for both cell culture in spinner flasks as well as general laboratory procedures requiring the use of magnetic stirring equipment. Dura-Mag™ stirrers feature brushless, maintenance-free DC motors with drive assemblies designed for quiet operation.

Stainless steel covers are stamped to show the vessel positions for accurate placement and optimum performance.

### Dimensions and Capacities

(Front to back depth measurements include power cords and control knobs)

#### Two-Position Model

Dimensions: 9.5" W x 22.5" D x 3.5" H

Designed to fit side-by-side in most incubators.

Maximum flask size is (2) 8L vessels.

CLS-4100-02

#### Five-Position Model

Dimensions: (Standard Model) 16.75" W x 19.25" D x 3.5" H

(Compact Model) 14.75" W x 16.75" D x 3.5" H

Standard Model Maximum flask size is (5) 1L or (4) 3L vessels.

Compact Model Maximum flask size is (5) 100mL or (4) 1L vessels.

#### Nine-Position Model

Dimensions: 16.75" W x 19.25" D x 3.5" H

Maximum flask size is (9) 500mL vessels.

Trouble-Free Brushless Motor

Integrated Power Supply, for 100 to 220V Service

Heavy Duty Magnets and Drive System

Trouble-Free Non-Slip Toothed Kevlar Belt Design with Easy Replacement

Stainless Steel Plate Cover

Speed Range from 25 to 400RPM with Clockwise Control

## Spinner Flasks

### Chemglass Life Sciences' Microcarrier Spinner Flasks

Spinner Flasks promote optimal growth of suspension and microcarrier cultures. They are available in a variety of configurations and sizes. Indented versions help prevent the accumulation of microcarrier beads under the impeller blade. Each is complete with a three-neck glass flask, caps, and impeller assembly. All glass flasks, except the jacketed model, are graduated.

## Dip Tube Assemblies, 3-Port, SS, With Hose Barbs For Spinner Flasks

Our hose barbed 3-port drip tube assemblies are designed for addition or sampling of media from Angled Side Arm (ASA) Spinner Flasks. The dip tube assemblies are constructed of 316L stainless steel, electropolished to a 20Ra (or better) finish and include a blue PP GL-45 open top cap with white silicone gasket.

### Dip Tube Assemblies, 3-Port, SS, With Hose Barbs For Spinner Flasks

## Thermowell Assemblies, 3-Port, SS, With Hose Barbs For Spinner Flasks

Our hose barbed 3-port large diameter thermowell assemblies are designed to accommodate a wide variety of RTD's and dial thermometers of different diameters for measuring the process temperature in our Angled Side Arm (ASA) Spinner Flasks. All 316L stainless steel tubes have an electropolished finish to a Ra 20 $\mu$  (or better). These assemblies feature a thermowell tube with 0.375" OD and a 0.305" ID that will accept all 1/4" thermometer probes. The assemblies include a blue PP open top GL-45 cap with white silicone gasket.

### Vent Port Assemblies For Transfer Bottles

Vent port assemblies constructed of 316L stainless steel and electropolished to a 20Ra or better finish. Configurations consist of a single vent tube, vent and short fill tubes, or angled vent and fill tubes. Supplied with a GL-45 open top cap and silicone gasket. Precision pump tubing size to fit adapters is listed.

## Vertical Side Arm (VSA) Bioreactors

CLS-1440-100

CLS-1440-10

### VSA Dura-Drive™ Overhead Motors, Standard

- Easy mounting bracket with 'peg & grommet' design
- Twist-lock, power cord plug safely prevents disconnection from power source

Dura-Drive™ overhead motors are designed for use with SS or PTFE impellers to stir media or other liquids in bioreactor vessels and spinner flasks. A CLS-1440 overhead drive adapter is required with this motor. Includes power supply.

#### Dura-Drive™ Overhead Motor

Part No.	Voltage	Qty.	Price
CLS-1440-100	120	1	\$2,505.40 ♥

### VSA Overhead Drive Adapter, Standard

The standard overhead drive adapter is used to attach a standard overhead drive motor to a SS or PTFE impeller for use with bioreactor vessels or spinner flasks. The adapter is manufactured from 316L electropolished stainless steel with polyester / stainless steel bearings.

#### Overhead Drive Adapter

Part No.	Dimensions	Qty.	Price
CLS-1440-10	161mm OAH, 78mm from cap to top	1	\$1,537.70 ♥

### VSA Overhead Drive Adapter, Preventative Maintenance Kit

CGLS PM Kits include all of the high maintenance items required to keep your Overhead Drive Adapters functioning to the high standards. Each kit contains an illustrated parts list for easy identification of parts.

#### Maintenance Kit for Overhead Drive Adapter

	Replacement Shaft	1	

### Stainless Steel Pitch Blades for Dura Drive Motors

- Folding impeller assemblies
- Optimum agitation for VSA vessels
- Improves uplift and increases mass transfer rates
- Minimize shear

See CLS-1440-P-series Pitch Blades on the next page.

## VSA Impeller Assemblies for Overhead Drives, PTFE

Our PTFE impeller assemblies are designed to provide agitation for our vertical side arm (VSA) vessels and spinners when used with our cap adapter and Dura Drive overhead motor.

**NOTE:** Stainless steel impeller assemblies are available as special order. Please contact us for details.

## VSA Stainless Steel Pitch Blade Impeller Assemblies

### Designed for Overhead Vertical Sidearm Vessels

Our stainless steel pitch blade folding impeller assemblies are designed to provide optimum agitation for our Vertical Side Arm (VSA) vessels. These impellers will improve uplift mixing and increase mass transfer rates while minimizing shear to cultures. They can be used with our cap adapter and Dura Drive Overhead Motor. The impellers are made from 316L stainless steel and supplied with a dust shield as well as a locking ring to secure the paddle in a horizontal position once inserted into the flask.

## VSA Sparger Assemblies, 3-Port, SS, with Hose Barbs and Holes

Our 3-port sparger assemblies with drilled holes, 0.040" spaced 1/2" apart, and hose barbs are designed for vigorous aeration in our vertical side arm (VSA) vessels. These assemblies are constructed of 316L stainless steel, electro-polished to a 20Ra finish or better and include a blue polypropylene GL-45 open top cap and white silicone gasket.

### 3-Port Sparger Assemblies with Holes

## VSA Thermowell Assemblies, 3-Port, SS, with Hose Barbs for VSA Vessels

Our 3-port large diameter thermowell assemblies are designed to accommodate a wide variety of RTD's and dial thermometers of different diameters for measuring the process temperature in our vertical sidearm bioreactor vessels. All 316L stainless steel tubes have an electro-polished finish of a Ra 20 $\mu$  or better, inside and out. These assemblies feature a thermowell tube with 0.375" OD and 0.305"ID that will accept all 1/4" thermometer probes. These assemblies include a blue open top GL-45 polypropylene cap with a white silicone gasket.

## VSA Probe Holders

Our probe holders are designed to secure pH and DO probes into 45mm vertical sidearm vessels. Includes thermoplastic, polyester cap and silicone gasket. This assembly is designed to hold an Ingold pH or DO electrode securely in place in your cell culture vessel via the 45mm sidearm. It consists of: red high temperature 45mm screw cap, 316L stainless steel probe holder with a Pg 13.5 thread, and a white silicone rubber liner. Comes fully assembled for fast and easy set-up.

## Vertical Side Arm (VSA) Bioreactors

CLS-1437-series

### VSA Harvest Tube Assemblies, 3-Port, SS, with Hose Barbs

Our 3-port harvest assemblies are designed for insertion into our vertical sidearm bioreactor vessels. They are manufactured with 1/4" and 3/8" 316L stainless steel tubing and facilitate rapid removal of liquid from bioreactor vessels. Harvest tube assemblies have an electro-polished finish of Ra 20 $\mu$  or better, inside and out. Includes a blue open top GL-45 polypropylene cap with a white silicone gasket.

### VSA Addition Dip Tube Assemblies, 3-Port, SS, with Hose Barbs

Our hose barbed 3-port dip tube assemblies are designed for addition or sampling of media from Vertical Side Arm (VSA) Bioreactor Vessels. These addition dip tube assemblies are ideal for liquid addition of acid, base, anti foam or media. They are constructed of 316L stainless steel, electropolished to a 20Ra (or better) finish and include a blue, polypropylene GL-45 open top cap and white silicone gasket. Tube lengths are 3-3/32" long.

## DO Probes, Hamilton

The Oxyferm FDA is an electrochemical oxygen sensor suited for applications with high demands for hygiene, e.g. in pharmaceutical industry, in biotechnology and in foods and beverages production. When using Oxylyte USD electrolyte, even upside-down insertion is possible. The sensor is equipped with a FDA approved membrane for usage in hygienic processes.

## pH Probes, Hamilton

The Easyferm Plus K8 sensors are designed to withstand demanding applications in pharmaceutical and chemical industries. The EVEREF-F reference cartridge ensures that the Phermlyte reference electrolyte remains free of silver and precipitation. The Easyferm Plus K8 is supplied with a pre-sterilized electrolyte which prevents the diffusion of sample into the sensors. It withstands steam sterilization, autoclaving, CIP, organic solvents and strong acids. Fully autoclavable or in-situ sterilizable.

### Specifications

<b>pH Range</b>	0-14
<b>Electrolyte</b>	Pressurized PHERMLYTE
<b>Pressure Range</b>	0-6 Bar
<b>Electrical Connector</b>	Type K8 - Standard pH Connector Head or VP
<b>Reference System</b>	HAMILTON EVEREF-F, Silver ion barrier included

## Silicone Rubber Heaters For VSA (Vertical Side Arm) Bioreactor

Silicone rubber heater with boot latch, lace-style closure for 4 and 6 neck VSA (vertical side arm) Bioreactor. Heaters are 375 watts and include a 6ft cord with an IEC two prong plug. Please reference the below chart for sizing the correct heater to your vessel. If you do not know the exact outside diameter the chart gives the approximate circumference which can be measured with a flexible tape measure. Please Note: These Heaters Cannot Be Directly Plugged Into a Wall Receptacle and Require a Temperature Controller with a Thermocouple or RTD in Order to Properly Maintain and Reach a Controlled Temperature.

- 56mm OD PP outer housing with 6-10mm stepped hose barb connections
- 0.2 micron PTFE filter membrane

Designed for bi-directional flow, these filters serve as cost-effective hydrophobic vents for contamination-sensitive materials and as protection from hazardous aerosols. Also used for laboratory vacuum pump protection. Safely autoclave up to 30 times for sterile applications.

### PTFE Vent Filters, Non-Sterile

Part No.	Membrane (µm)	Filter Dia. (mm)	Qty.	Price
<b>CLS-1397-050A</b>	0.2	50	10	<b>\$237.05</b>

### PTFE Vent Filters, 50mm, Non-Sterile

- 60mm OD PP outer housing with 6-12mm stepped hose barb connections
- 0.2 micron PTFE filter membrane

Designed for bi-directional flow, they serve as a cost-effective hydrophobic vent for laboratory applications. Autoclave up to 3 times for standard sterile applications.

### PTFE Vent Filters, Non-Sterile

Part No.	Membrane (µm)	Filter Dia. (mm)	Qty.	Price
<b>CLS-1397-050B</b>	0.2	50	10	<b>\$86.20</b>

## Multiple Types of Tubing Available

- Advantaflex
- Bioprene
- C-Flex
- Flexan
- Flexelene
- M-Flex
- Peroxide Cured Silicone
- Pharmapore
- Pharmapure
- PharmEd
- Platinum Cured Silicone
- Puri-Flex
- PVC
- TPE
- Tygon

## Platinum-Cured Silicone Tubing, Medical Grade

### SILCON® MED-X

- Platinum cured for the highest degree of purity (least extractable)
- Reusable — will withstand repeated sterilization<sup>▲</sup>
- Translucent natural color for visual contact with the flow
- Free of BPA, latex and phthalates
- RoHS compliant

SILCON® MED-X tubing is made under good manufacturing procedures and conforms to the biocompatibility requirements of USP Class VI. SILCON® MED-X's surface properties resist sticking and encrustation and will not support bacteria growth. The tubing is soft, pliable, and contains no plasticizers which could leach out, causing flow contamination or tube hardening. Care is recommended in the selection and application of fittings and clamps as sharp barbed fittings or unlined metal clamps could tear into the wall. Autoclavable

Exposed to repeated steam sterilization, long-term high temperature or pressure, silicone will eventually relax and become gummy. It should then be replaced.

### Platinum-Cured Silicone Tubing, Silcon® MED-X

Part No.	ID (in.)	OD (in.)	Wall Thick (in.)	Size	Roll Length (ft.)	Price

### Silcon®, Peroxide Cured, Silicone Tubing In Rolls

Peroxide-cured Silicon® Silicone Tubing is designed for applications where flexibility, resiliency and durability are required. Its inner smooth surface reduces the risk of particulate entrapment and microscopic buildup during fluid transfer.

Tubing is FDA food grade compliant, entirely non-toxic, non-hemolytic and non-pyrogenic. It also meets 3-A Sanitary Standards, FDA 21 CFR Part 177.2600 Criteria and NSF 51 Standard. Withstands temperature extremes from -100°F to 500°F (350°F maximum for NSF applications). Autoclavable.

Exposed to repeated steam sterilization, long-term high temperature or pressure, silicone will eventually relax and become gummy. It should then be replaced.

*Sold in standard lengths of 50ft.*

## Male Luer Lock, Needleless Injection Site, Swabable, Polycarbonate, Silicone, Bioreactor

### Male Luer Locks

Part No.	Description	Qty.	Price
CLS-1399-F50	Male Luer Lock, Needleless Injection Site, Swabable, Polycarbonate, Silicone	25	\$75.10 ♥

## Female Luer, 1/8" Barb

The Female Luer thread style to 1/8' barb (3.2mm) ID Tubing is gamma stable and polycarbonate. Ideal for use with CLS-1399-F50.

### Female Luer to 1/8" Barb

Part No.	Description	Qty.	Price
CLS-1399-G50	Female Luer, 1/8" barb, PC	25	\$15.25 ◇

## Female to Male Luer Lock, Polycarbonate, Bioreactor

### Female to Male Luer Locks

Part No.	Description	Qty.	Price
CLS-1399-F55	Female to Male Luer Lock, Polycarbonate	25	\$52.35 ♥

## Flow Control Tube Clamps, 0.45" OD

Acetal clamp is autoclavable; won't rust, corrode or distort. Twelve-position ratchet control adjusts from full flow to complete closure.

### Flow Control Tube Clamps

Part No.	Accepts Tubing OD Up to (in.)	Qty.	Price
CLS-1436-C01	0.45	5	\$10.40 ◇
CLS-1436-C02	0.45	25	\$38.70 ◇

## Single Position Tubing Clamp for 0.25" OD Tubing

Plastic clamp is manufactured from blue polypropylene and is both autoclavable and gamma stable. Clamp is designed for on/off control of fluid or air. One-hand control and economically priced for disposable applications. Packed 25 per Case.

### Tubing Clamps

Part No.	Description	Qty.	Price
CLS-1436-SP4	Tubing Clamp, 1/4" OD, Single Position	25	\$33.65 ◇

## Single Position Tubing Clamp for 0.50" OD Tubing

Plastic clamp is manufactured from white polypropylene and is both autoclavable and gamma stable. Clamp is designed for on/off control of fluid or air. One-hand control and economically priced for disposable applications. Packed 25 per Case.

### Tubing Clamps

Part No.	Description	Qty.	Price
CLS-1436-SP5	Tubing Clamp, 1/2" OD, Single Position	25	\$44.90 ◇

## Cable Tie Gun, Plastic, Adjustable Tension, Zip-Tie

Plastic gun works with cable ties up to 0.19" wide and produces 18-50lbs of tensile strength. Gun tightens and cuts. Not compatible with stainless steel ties.

### Adjustable Tension, Cable Tie Gun

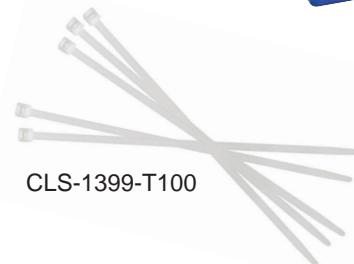

Part Number	Description	Qty.	Price
<b>CLS-1399-G100</b>	Cable Tie Gun, Plastic, Adjustable Tension	1	<b>\$33.45</b> 

CLS-1399-G100

## Cable Ties, 4" Length, Nylon 6.6, Autoclavable

Tie wraps are injection-molded of 6.6 nylon and won't corrode or stretch. Durable locking mechanism holds securely. Each natural-color, 4-inch tie is 1/8" wide and has an 18lb strength. Maximum bundle / wrap diameter is 1-inch. Long term temperature range is -40 to 85°C. Short term temperature range is 180°C. Autoclavable.

CLS-1399-T100

### Nylon Cable Ties, 4-inch

Part Number	Description	Qty.	Price
<b>CLS-1399-T100</b>	Cable Tie, 4" Long, Nylon 6.6, Natural	100	<b>\$5.35</b> 

## Tubing Cutters

For cutting tubing made from plastic, FEP, PTFE, polyethylene, polypropylene, or rubber.

### Tubing Cutter

Part No.	Description	Qty.	Price
<b>CG-1975-30</b>	Tubing Cutter	1	<b>\$15.80</b> *

CG-1975-30

## Mobile Spool Rack

Rack is on casters making it easy to move from lab to lab. It will hold up to 6 each 13" spools. With the rack being only 17" wide it can fit into tight spaces between lab benches and hoods. Constructed of powder coated aluminum making the unit light and resistant to most lab environments.

### Mobile Spool Rack

Part No.	Dimensions L x W x H (in.)	Qty.	Price
<b>CG-1997-R-10</b>	35 x 17 x 52	1	<b>\$2,804.25</b> *

CG-1997-R-10

CLS-1390-21C

Ideal for sampling ports in biopharma applications.

CLS-1390-21V

### Swabable Valve with 1/8 inch Barb

Unique and innovative patented design allows use in a wide variety of demanding applications where a high flow and a closed system are a must. Valves are DEHP-free, made with ISO-10993 materials and not made with natural rubber latex. Bodies are made with BPA-free materials and polycarbonate. Valves mate securely with standard ISO-594 compliant syringes and connectors.

Easy, direct assembly to tubing without Luer connectors or solvents and adhesives.

#### Swabable Valve with 1/8" Barb (Purchase Luer Caps Separately)

Part No.	Description	Qty.	Price
CLS-1390-21V	Swabable Valve with 1/8" Barb	25	\$70.35 ♥
CLS-1390-21C	Non-vented Luer Cap without Stem, Female	25	\$27.00 ♥

MPC Series Couplings add ease of use and security to your most critical fluid handling applications. Choose from a full line of connectors and configurations, including pressure sealing caps and plugs, in sizes to fit 1/8", 1/4" and 3/8" tubing. MPC couplings offer optional locking sleeves to further guard against accidental disconnects. In addition, coupling halves can be rotated when connected to reduce tube kinks.

## Flip, Click and Pull Assembly Procedure

### FLIP

Unsnap and flip down the protective pull tab covers on each connector half.

### CLICK

Align connector halves with pull tabs hanging down. Slide halves together. Independently squeeze each side of connector until you hear an audible "click."

### PULL

To complete the connection, simply snap the pull tabs together by pushing on the CPC logos and pull the membranes from the connector.

## Click, Pull and Twist Assembly Procedure

### CLICK

Align male and female couplings; push until "click" is heard. Slight rotation of lock ring may be required for proper alignment prior to connection.

### PULL

Snap membrane pull tabs together and pull from connector.

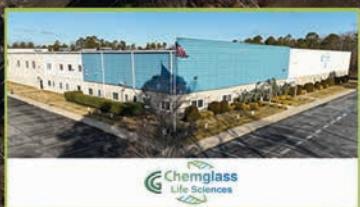

### TWIST

Twist the blue lock ring clockwise until "click" and rib to arrow alignment confirms secure final connection.
