# Laboratory Essentials

Products in *Small Quantity Packs*

Why we're right for you.

### Manufacturing Experience

- Leading scientific glassware manufacturer for more than 70 years
- Most glass process reactor expertise in the industry

### Quality Products in Stock

- 12,000+ standard chemistry and life sciences products
- In stock and ready to ship

### Superior Customer Care

- Prompt, courteous and efficient customer service
- Dedicated technical service representatives
- Technical assistance for custom and oem glass

Trademarks are the property of their respective owners. Prices are subject to change without notice.

## Agarose LE, Organic, Solvent-Free

- Multi-purpose, high purity
- Enhanced resolution and clarity
- Reduced background
- Low EEO / increased electrophoretic mobility
- RNase-, DNase- and protease-free
- High hysteresis / improved thermal stability

Agarose LE is a highly purified agarose, used for nucleic acid electrophoresis (analytical and preparative), protein electrophoresis (including radial immunodiffusion) and various blotting protocols. It's refined using a process that excludes organic solvents, yielding a cleaner end-product with a significantly reduced environmental impact. Agarose LE can be used for analyses of proteins and nucleic acids of various sizes (150bp to 6kbp).

Its low EEO (Less than or Equal to 0.13mr) promotes increased electrophoretic mobility, yielding improved resolution and shorter run times. This also allows macromolecules and larger particles (subcellular fragments, viruses, etc.) to migrate more freely through the gel matrix. The consistently low EEO also provides a reduction in band distortion (caused by counter flow) that can result from the presence of excessive sulfate-rich negative ions.

Benchmark Agarose LE easily soluble and free of nucleases. It is highly transparent (forms a clear, colorless solution at 1g: 100mL H<sub>2</sub>O), and exhibits exceptionally low absorption of chemical staining agents. Pore size can be adjusted by simple modifications to the concentration ratio.

Formulated for high gel strength and integrity, Agarose LE exhibits exceptional thermal stability and mechanical resistance, ensuring safe, easy handling, regardless of whether a denaturing agent has been added.

## Low Form, Griffin Beaker Starter Pack, Double Scale, PYREX®

- Five popular sizes per starter pack

An assortment of popular low form Griffin beakers. The pack consists of five beakers; **one each of the 50, 100, 250, 600 and 1000mL** capacities. Ideal for start-up requirements and customers who need a variety of beaker sizes, but have limited lab space or glassware needs.

### Graduated Cylinders, Single Metric Scale, "To Deliver", PYREX®

Pyrex® cylinder calibrated "To Deliver". Polyethylene bumper guards are supplied with sizes 25 through 2000mL. The 5 and 10mL have an enlarged funnel-shaped top for ease of filling. The 10 and 25mL sizes are comparatively short to provide increased stability. The 100mL size may be used for some ASTM distillation tests. Scale is durable white ceramic enamel. Designed from ASTM Specification E1272, Style 1, Class B requirements.

### Solution Bottles, 500mL, Polystyrene, Sterile

- Polystyrene container

Solution bottles are ideal for storage of media, buffers, and other aqueous solutions. Bottles are manufactured from polystyrene and are e-beam sterilized. Feature heavy wall construction, graduations, concave shape and knurled cap for easy handling. Solution bottles are RNase- and DNase-free.

### Square Media Bottles, PETG, Sterile, Graduated

- Pyrogen-, DNase-, RNase- and particle-free
- Leak-proof, transparent and optically clear
- Freezable at -20°C, disposable and recyclable
- Gamma irradiated - sterility assurance level (SAL) 10<sup>-6</sup>
- 20% overhead space

Break-resistant, durable media bottles are manufactured from polyethylene terephthalate copolyester (PETG) and graduated to contain. They are square / octagonal with rounded edges for easy gripping. Caps are manufactured with polyethylene (HDPE) and come with security rings for tamper-evident sealing. Caps are liner-free and leak-proof. Bottles provide reduced permeability to both CO<sub>2</sub> and O<sub>2</sub>. **NOTE: bottles are not autoclavable.** Bottle Design: Patent US D535566S. Tamper-evident Cap Design: Patent US D561587S.

## Safety Wash Bottles, Polyethylene

- Easy-to-read, LDPE dispensing bottles are break-resistant
- PP nozzle tops
- Intended for short-term dispensing use
- Include DOT, CAS numbers, NFPA codes and symbols, protective equipment symbols, and target organ information

Easy-to-read, break-resistant dispensing bottles include DOT, CAS numbers, National Fire Protection Association (NFPA) codes and symbols, protective equipment symbols, and target organ information. Polypropylene nozzle assemblies are leakproof and color-coded to match bottle label. Toluene bottle is solid red with white lettering and hazard information.

## Multi-Compartment Petri Dishes, Sterile, 100mm

- High clarity polystyrene
- Flat, transparent surface
- Stackable for easy storage and handling
- Sterilized by E-Beam
- Non-pyrogenic, DNase- and RNase-free

These non-treated polystyrene plates are transparent and DNase / RNase-free. The bottom has a ridge allowing for easy handling and stacking. The plate has three vents for gas exchange and compartments for bacterial culture use with different media under the same conditions.

## Semi-stackable, Multi-compartment, Sterile Petri Dishes

Part No.	Number of Compartments	Dia. x Height (mm)	Qty.	Price

## Petri Dishes, TC Treated, Sterile

- Flat transparent surface for distortion-free observation
- Vacuum plasma TC treatment, excellent cell adherence
- Stackable for easy storage and handling
- Sterilized by E-Beam
- Non-pyrogenic

Cell culture dishes are ideal for all types of culturing where microscopic observation is required. Numeric marks on the bottom of each dish allow users to identify the location of cells.

## Mini Centrifuges

- Quiet, vibration-free operation
- Include two, easy-to-change rotors

These mini centrifuges are popular for quick spins, microfiltration of samples, and cell separations. The clear covers are made of high strength plastic and provide easy viewing of samples. These centrifuges quickly accelerate to their maximum speed and stop within seconds. Manufactured to precise specifications, resulting in smooth runs that are quiet and vibration-free. Included is a round rotor with capacity for six standard microtubes (1.5 to 2.0mL) as well as a strip tube rotor for 2 x 8 PCR strips or sixteen individual 0.2mL tubes. The rotors can be easily interchanged by the user within a matter of seconds.

### Bottle Top, Vacuum Filter System with Molded Graduations

CGE-2009-007

- High flow rates and throughput
- Low protein binding low chemical extractable
- Non-pyrogenic and surfactant-free
- 0.22µm membrane PES
- Molded clear graduation on both filter tops and receiving bottles
- 45 mm bottle tops fit most 45 mm neck plastic and glass media storage bottles
- Easy grip style receiving bottles can also be used as storage bottles
- Maximum bottle volume is greater than filter tops, eliminating overflow

Disposable filter systems are useful for large volume sample separation and sterilization for tissue culture media and other biological buffers. PES membrane filters with graduated filter tops made with polystyrene, and polyethylene necks with polystyrene receiving bottles. A separate sterile polyethylene cap is included.

Part No.	Description	Qty.	Price
CGE-2009-007	500mL Filter System, PES, 0.22µm	1	\$11.00 Ω

### Syringe Filters, 25mm Diameter, Sterile, Individually Wrapped

CGE-2005-series

- PES membrane

PES Membrane: Low affinity for proteins and extractables with substantially faster flow rates than PVDF; suitable for pre-filtration and filtration of buffers, protein solution and culture media.

#### Individually Wrapped PES Syringe Filters

Part No.	Housing Dia. (mm)	Membrane Material	Membrane Pore Size (µm)	Qty.	Price

CGE-2005-045	25	PES	0.45	10	\$14.95 Ω

CLS-2011-series  
(One PP stand included with each 12-pack of tube filters.)

### 50mL Centrifuge Tube Filters, Individual Packs, Sterile

- Filter systems include: tube filter, centrifuge tube, and cap
- Eliminate sample transfer step by filtering directly into centrifuge tube

Vacuum filter systems can be used for separation and purification. CELLTREAT® filtration systems are manufactured in a Class 100,000 clean room from USP class VI virgin polystyrene. They utilize a polyethersulfone (PES) membrane material in 0.22µm or 0.45µm pore sizes for rapid flow rate and low protein bonding. The filter units are individually packaged in easy-to-open plastic bags with individually wrapped caps. Gamma irradiation sterilized and non-pyrogenic.

## Erlenmeyer Flasks with Vent Caps, Flat Base, Sterile

- PETG bottle with HDPE vent cap
- Ideal for shaker culture applications.
- Sterilized by E-Beam
- Non-pyrogenic
- Packaged in sterile bags
- Breathable membrane
- 0.22µm hydrophobic filter for gas exchange
- Non-toxic and environmentally friendly

### Erlenmeyer Flasks with Vent Caps

## Cell Culture Flasks with Vent Caps, TC, Sterile,

- Angled neck for easy access
- High clarity, 100% virgin polystyrene
- Frosted writing and clear graduations
- Notched bottom for slip-free stacking
- Sterilized by E Beam
- Vented caps (with breathable membrane)
- Clear lot number for batch traceability
- Non-pyrogenic, DNase- and RNase-free

Cell culture flasks are available in cell growth areas ranging from 25cm<sup>2</sup> to 225cm<sup>2</sup>. Tissue culture treated with a vent cap. Vent caps with 0.22 µm hydrophobic filters for gas exchange.

## Lab Mini Balances, 100G and 500G

- Easy-to-read, backlit LCD
- Calibration function
- Includes batteries and a snap-on, protective cover
- Compact - less than 3" wide

Accuris Mini Balances are compact, easy to use and convenient for a variety of weighing applications. With a footprint of only 2.6 x 3.9 inches, these Mini Balances offer exceptional accuracy and linearity through their full weighing ranges.

Available with either a 100g or 500g capacity, these digital balances feature an easy to read, backlit, liquid crystal display. Buttons for ON/OFF, MODE and TARE are located on the front for easy access. The software includes a calibration function for in-lab calibration with a 100g or 500g calibration weight. Calibration weights are available separately.

Portable Accuris Mini Balances are powered by 2 AAA batteries (included). After one minute sitting idle, the power automatically shuts off to conserve battery life. Ideal for lab or field use, each includes a snap on, protective cover with instructions conveniently printed on the underside. Ninety-day warranty included.

CLS-3489A-series

## Single Channel Variable Pipettors, Precision Grade, Value

Micropette pipettors offer uncompromising levels of accuracy and precision in the laboratory. Nine variable volume pipettes in the range. Volume adjustment is selected by turning the thumb plunger mechanism. Micropette's are calibrated in accordance with ISO/DIS 8655. Each pipettor passes a quality control / calibration test and is supplied with a certificate.

## Motorized Pipette Filler, Controller, AccuHelp™

The rechargeable lightweight AccuHelp motorized pipettor combines advanced ergonomic design with precise liquid dispensing. The round shape, balanced weight, and light action spring buttons reduce fatigue and increase accuracy. AccuHelp is compatible with glass or plastic pipettes, ranging from 0.1 to 100mL and is available in four different colors.

NOTE: There is a red light on the back of the pipette. If the red light turns on, that means the battery is low. There is also a red light on the charger itself. The red light on the charger means that the pipette is being charged. If the light on the charger turns green, the charging is complete.

### \*RULES - Use promo code ACCUHELP19

Participation in this offer is restricted to purchases of CLS-3472E-series AccuHelp Motorized Pipette Fillers. Purchase one at the sale price of \$269 and receive a second free. Mixing of colors is permitted. Offer valid from 1/1/2019 through 12/31/2019. Purchaser must specify promo code ACCUHELP19 when placing the order.

Valid on US and Canadian purchases only. May not be combined with any other offer or discount. This offer is non-transferable and void where prohibited by law or company policy. Offer is subject to Chemglass Life Sciences' standard terms, conditions and contracts. Offer not valid through distributors.

## Plain Pipette Tips, Extra Long, Non-Barrier, Sterile

- Tips are manufactured from virgin polypropylene
- Manufactured using smooth surface technology
- Free of nucleic acids, Rnase-, Dnase- and pyrogen-free
- Packed 96 per rack in standard 8x12 format polybox

Pipette tips are manufactured from the finest virgin polypropylene using precise production techniques that provide consistent quality and performance. They contain no recycled, reprocessed or altered plastics that may introduce contamination or defects. Our market leading, smooth surface technology helps facilitate the release of the tip from the mold, eliminating the need for releasing fluids which can cause contamination.

All tips are pre-sterilized and certified by an independent lab to be free of nucleic acids, Rnase, Dnase and pyrogens.

## Pipettes

### Pasteur Pipets, Polypropylene, Non-Sterile

#### SAFETY and EFFICIENCY

- No more broken glass – more durable than standard glass pipets
- Flexible plastic helps prevent glove or skin punctures
- Polypropylene Pasteur pipet will not shatter, eliminating losses due to broken glass fragments in your work
- Can be autoclaved

#### VALUE and CONVENIENCE

- Saves time and money - traditional glass Pasteur pipets are often damaged during shipping or handling
- Reduce cost by eliminating “sharps” disposal
- Packed non-sterile in re-sealable bags of 100 pipets or 200 per box

Polypropylene Pasteur pipets offer the aspirating precision of a glass pipet and the convenience of a plastic, ready-to-use product. The virgin polypropylene pipets offer a safer alternative to glass pipets. Pipets are available in two sizes: 5-3/4” and 9” for easier handling and longer reach for working with larger vessels.

#### Polypropylene, Pasteur Pipets

Part No.	Length (in.)	Package	Qty.	Price
CGE-3489-005	5-3/4”	re-sealable bag	100	\$15.00 Ω
CGE-3489-009	9”	re-sealable bag	100	\$15.00 Ω
CGE-3489-B05	5-3/4”	box	200	\$25.00 Ω
CGE-3489-B09	9”	box	200	\$25.00 Ω

### Plastic Serological Pipets, Bagged, Sterile

- Include negative graduations for extra volume
- Edged color-coded band for identification
- Non-pyrogenic, non-cytotoxic, non-hemolytic, DNase- and RNase-free
- Polyolefin fiber filter to reduce contamination

Serological pipettes can be used in both tissue culture and bacterial culture experiments. Made from high clarity polystyrene. Sterilized by E-beam.

## Disposable Transfer Pipets, Bulk Packed, Non-Sterile

Unbreakable, all-in-one pipets eliminate the hazard of broken glass and exposure to infectious materials. Put an end to matching rubber bulbs and glass pipets. Pipets are molded from transparent, low density polyethylene and are inert to biological fluids and most acids. The low-affinity surface reduces the loss of cells and valuable proteins due to binding. Can be sealed and refrigerated. Temperature resistant from  $-196^{\circ}$  to  $+90^{\circ}\text{C}$ . Can be used in liquid nitrogen.

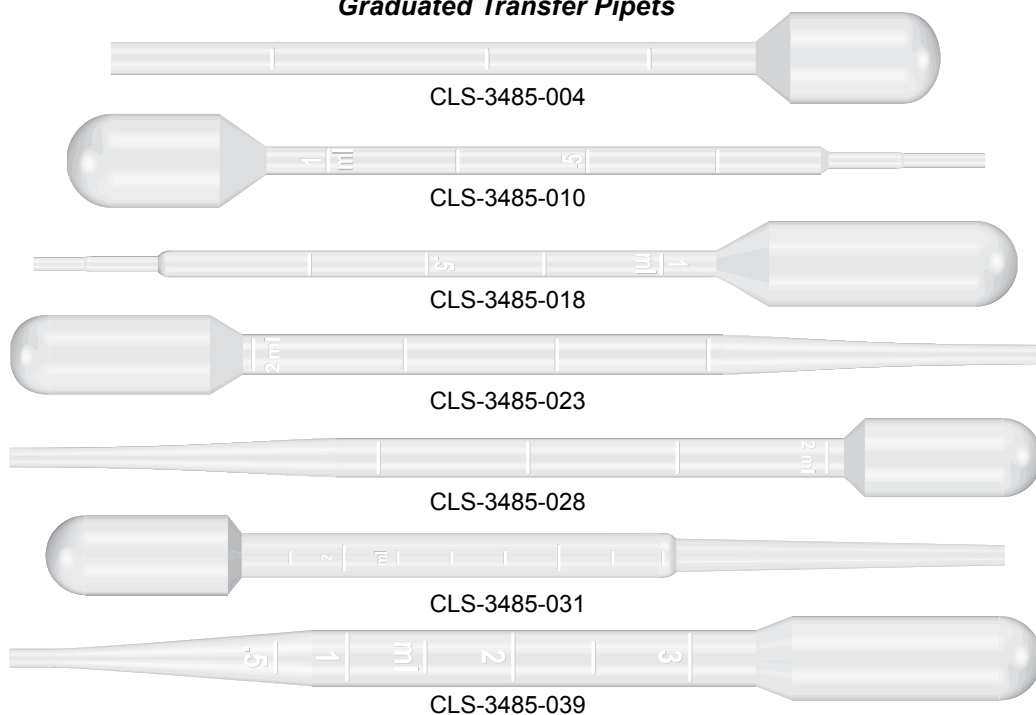

### Disposable Transfer Pipets in Bulk Packs, Non-Graduated, Non-Sterile

## Foam Plugs for Test Tubes and Laboratory Flasks, IDENTI-PLUGS®

- Economical
- Open-cell, 1.45 lb. uniform-density foam
- Breathable and non-absorbent
- Use over a wide temperature range
- Autoclavable
- Chemical resistant
- Proven safe for algae culturing

Identi-Plugs® are for use with test tubes and flasks. They are reusable and leave no clinging fibers like cotton plugs. They provide a snug fit, yet permit free air flow. Plugs are ideal for use with Drosophila vials. They spring back to original shape after repeated use. Identi-Plugs can also be used as a cleaner for lab pipettes, tubes, vials, as well as industrial precision tubing. Inscriptions with Identi-Marker pens may be made for quick identification.

The **Assorted Color Variety Pack, CGE-1490-020C**, includes two plugs each of the following assorted colors: red, green, yellow, charcoal, blue, and white

### Disposable SmartSpatulas®

- Inexpensive spatulas that scoop, scrape and stir
- Autoclavable for sterile applications
- Antistatic Micro for small volumes
- Unique hollow cores minimize thermal transfer
- Excellent for use as stir rod or policeman
- Resistant to dilute acids and bases
- Comply with FDA regulations for food-contact applications; made of virgin PP
- Shatter resistant for liquid nitrogen frozen samples

SmartSpatulas for laboratory sample handling and manipulation are an economic alternative to reusable spatulas. Made of virgin polypropylene, SmartSpatulas are autoclavable for sterile applications. Single-use, they help to reduce cross contamination, are resistant to dilute acids and bases. The unique hollow core minimizes thermal transfer.

SmartSpatulas comply with FDA regulations for food-contact applications, are shatter resistant for liquid nitrogen frozen samples and can also be used as stir rods or policemen.

## Digital Magnetic Stirrer with Timer, Low Profile, VELP

CG-2000-V10

Top View

### Reliable and Precise

- Bright digital display for easy viewing
- On board timer for unattended operations
- Auto reverse of the stirring direction to ensure better mixing
- SpeedServo™ technology maintains stirring speed during viscosity changes
- Speed regulation from 80-1500 rpm

### Robust Structure and Compact Design

- Equipped with a brushless motor
- Technopolymer case guarantees high resistance to chemicals
- White surface for easy visualization of particles and color changes
- Accepts up to 5 liter flasks

The MST is a compact, low profile, digital stirrer with a manually adjustable speed range of 80-1500 RPM. The bright, digital display allows for very accurate setting of the stirring speed which is adjustable in 10 rpm increments. SpeedServo™ technology provides for constant stirring speeds even during viscosity changes.

## Standard Wall Tubing, Excelon

- Equivalent to Tygon® R3603 & Nalgene™ 180
- Excellent alternative to latex
- More cost-effective than silicone
- Inner bore prevents any build-up
- Withstands autoclaving & gamma sterilization
- Durometer hardness (shore A): 55
- Temperature range: -58°F to 165°F
- Meets FDA standards (CFR 21, Part 175.300)

A low-cost yet high-quality solution for the transfer of liquids and gases, Excelon Laboratory and Vacuum Tubing provides premium performance, flexibility, and versatility. With a smooth-as-glass inner bore and crystal clear design, this Excelon tubing prevents build-up from occurring inside the tube, simplifying changeovers and clean up, and allows for easy monitoring of the flow of gases and liquids. Its proprietary design is made for extreme durability as well as flexibility, giving this PVC tubing the ability to withstand autoclaving and repeated gamma sterilization while also allowing for simplified and expedited set-up.

Metric tubing sizes available, contact us for details: [tech@cglifesciences.com](mailto:tech@cglifesciences.com)

## Cordless UV Lamps with Safety Switches, Handheld

- Reliable, high intensity UV
- Safety switch turns unit off when turned upside down
- Portable, lightweight and ergonomic
- Single or dual wavelength units available
- Charger and rechargeable batteries included
- 2-year warranty

Safe and easy to operate, these cordless lamps automatically turn off when inverted to protect the user from harmful UV radiation exposure. Models are available in wavelengths of 254nm, 365nm and a combo unit featuring both wavelengths.

UV transilluminator / UV lamps can be used for observing and imaging of DNA and RNA gels. They are essential devices for medical hygiene, bio-engineering, molecular biology, genetic studies and biological production, anti-counterfeit inspection, pharmaceutical production, criminal and forensic examination and verification. UV lamps can also be used to examine plates for thin layer chromatography.

When fully charged, the battery can sustain three hours of continuous use or approximately 500 intermittent uses. Charger (100~240VAC, 50/60Hz) and 12V rechargeable, lithium batteries included. The lamp wattage is 6 watts.

### Handheld, Cordless UV Lamps

Part No.	Wavelength	Qty.	Price
CLS-1625-100	254nm	1	\$289.00 *
CLS-1625-102	365nm	1	\$289.00 *
CLS-1625-104	254 / 365nm (Combo Unit)	1	\$289.00 *

### UV Replacement Bulbs (Order one of each for the Combo Unit.)

CLS-1625-254	254nm	1	\$23.90 *
CLS-1625-365	365nm	1	\$16.80 *

CGE-4789-series

### Drosophila Vials, Narrow and Wide

- Made from premium grade, transparent polystyrene
- Narrow, wide drosophila vials are glass-like clarity for sample observation
- Disposable vials are a safe and cost-effective alternative to glass vials
- Narrow vials 25x95mm or wide vials 28.5x95mm available
- Compatible with CGE-4790 Plugs

#### PLUGS SOLD SEPARATELY

#### Non-Sterile, Clear Polystyrene, Drosophila Vials

Part No.	Size (mm)	Accommodate Plugs	Qty.	Price
<b>CGE-4789-001</b>	25 x 95 (narrow)	<b>CGE-4790-001</b>	25	<b>\$15.00</b> Ω
<b>CGE-4789-003</b>	28.5 x 95 (wide)	<b>CGE-4790-003</b>	25	<b>\$15.00</b> Ω

CGE-4789-005

### Drosophila Bottles / Flasks, Polypropylene, Non-Sterile

- Molded graduations up to 100mL in 25mL increments
- Autoclavable Drosophila bottles
- Transparent bottle with square bottom
- Compatible with CGE-4790 Plugs

#### PLUGS SOLD SEPARATELY

#### Non-Sterile, Polypropylene, Drosophila Vials with Square Bottoms

Part No.	Size (mL)	Accommodate Plugs	Qty.	Price
<b>CGE-4789-005</b>	177 (6oz)	<b>CGE-4790-005</b>	25	<b>\$20.00</b> Ω

CGE-4790-series

### Drosophila Vial Plugs, High Density Foam

- Fly plugs are made of high-density foam
- Causes minimal shedding and reduce evaporation
- Maintains tight fit after repeated use and removal
- Plugs are compatible with CGE-4789 Drosophila vials and bottles

#### High Density Foam, Non-Sterile, Drosophila Plugs

Part No.	Fit	Qty.	Price
<b>CGE-4790-001</b>	Narrow Drosophila Vials	100	<b>\$21.95</b> Ω
<b>CGE-4790-003</b>	Wide Drosophila Vials	100	<b>\$21.95</b> Ω
<b>CGE-4790-005</b>	Drosophila Bottles	100	<b>\$29.95</b> Ω

## Weighing Dishes, Anti-Static, Square, Polystyrene

The polystyrene weighing dishes will resist diluted acids, aqueous solutions, alcohols and bases. They are ideal for weighing, dispensing or storing both liquid and powdered samples. They afford accurate pour-outs with minimal sample loss and can also be used as quick freeze trays for sample material. Dishes will withstand temperatures up to 80°C.

### Polystyrene, Anti-static, Square Weighing Dishes

Part No.	Cap. (mL)	L x W x H (mm)	Qty.	Price
CLS-1815-001	10	40 x 40 x 8	500	\$71.05 ◇
CLS-1815-002	100	78 x 78 x 25	500	\$91.60 ◇
CLS-1815-003	300	127 x 127 x 25	500	\$180.45 ◇

Square CLS-1815-series

## Weighing Dishes, Anti-Static, Hexagonal, Polystyrene

These dishes are excellent for handling solids or liquids during weighing. Dishes are easily bent into pouring spouts that enable non-spill transfer. The molded hexagonal design provides greater balance protection and safety. Not reactive with most substances. Dishes are suitable for weighing of static affected samples. They are stackable for easy storage and accessibility. Dishes will withstand temperatures up to 80°C.

### Polystyrene, Anti-static, Hexagonal, Weighing Dishes

Part No.	Size (mL)	Top ID x Base ID x H (mm)	Qty.	Price
CLS-1815-007	9	35 x 25 x 10	500	\$61.95
CLS-1815-008	58	70 x 47 x 20	500	\$92.70
CLS-1815-009	203	115 x 85 x 22	500	\$292.70
CLS-1815-010	355	130 x 95 x 30	500	\$202.70

Hexagonal CLS-1815-series

## Weighing Dishes, Pour Boat, Anti-Static, Polystyrene

These three sizes of weighing dishes have a pour spout that facilitates dispensing of powdered and liquid materials. Smooth, uniform and economical, the molded material is 20 to 30% thicker than conventional weigh dishes. Dishes can withstand temperatures up to 80°C. They can be used safely to weigh static-affected materials.

### Polystyrene, Anti-static, Pour Boat, Dishes

Part No.	Size (mL)	L x W x H (mm)	Qty.	Price
CLS-1815-004	12	50 x 37 x 8	250	\$34.65 ◇
CLS-1815-005	140	128 x 76 x 25	250	\$69.75 ◇
CLS-1815-006	270	180 x 117 x 25	250	\$93.95 ◇
